3-1-1984

Hi there !

A happy New Year to you all ! In the year of Big Brother it will be especially interesting to see what changes the Free Radio scene in Europe will have to face. Let's hope 1984 and its successors will turn out fine at least (more or less...).

Well, RT 12/84 (namely the first issue to be published in 1984) has the current loggings (including those over the Christmas-period) together with quite a lot of news (good and bad) and the usual stuff we have been sent by our regular and reliable reporters, amongst others Neal West of ECC-DX and Dave Scott of R.Apollo. Other names are not mentioned for reasons of safety (BB is watching you...hi!) so feel not too sad not reading your name in RT. By the way, the names mentioned above are not the real ones...

LOGS in RADIOTELEX

24-12-1983

+kHz	+Station	+Time-period	+Language,Remarks	+S-rate
6198.9	R.City Int'l (NL)	0945 - 1005	D,music,asking for QSO's,s/off	3-4

NEWS

R.Diana will be on the air direct from Denmark in the near future using 10 Watts of power. Their address is c/o Postbus 41, NL 7700 AA Dedemsvaart,NL

R.Apollo wasn't on December 27 but will be for a short test on January 8 and a 'regular' transmission is planned in 2 weeks time, Jan 22. They still use c/o P.O.Box 319, Edenbridge, Kent TN8 6QE, U.K.

R.Kristel's Ian Anderson (DX-prog) said that R.Laser 730 (see RT 10+11) the new offshore station was on the air ! Another DX-er said that he heard non-stop pop-music on 738 kHz, one channel above the planned 729. Ian Anderson-news usually is reliable...

Although numerous echo-effects shall make believe that R.Madison's home is in the Swiss Alps we think they either operate from Germany or the Netherlands or even use relay-transmitter(s)...As it seems, DJ Eddy Stone and technician Paul Bolle are new to shortwave Free Radio in general claiming not to know R.Lynda which they described as "strange" when asked in a reception report if Lynda put out tests for them....Madison has a QSL-card and wants 2 IRC (+reception-report...) send to Postbus 41,....

R.Brigitte,Postbus 10, NL 7954 ZG Rouveen,Holland, might organize a competition in 1984. The winner would get a cassette containing a studio programme of the station. If this plan comes true will be announced in all details in Brigitte's programmes. They usually transmit on 6298 kHz.

R.Hotel Amigo,Postbus 113, NL-9104 ZJ Damwoude,Holland says that they won't relay R.Concorde Int'l (Postbus 41,...) anymore. But R.Titanic Int'l will probably get some programmes transmitted as happened on Christmas.Hotel Amigo 's main frequency is 7350 kHz.

Süd-West-R.,Postfach 1471, D 6690 St.Wendel,West-Germany hopes to resume transmissions on shortwave soon using 500 (!!) Watts (new rig which still is in pieces currently, hi !! I wonder if that's too dangerous because it is very difficult to obtain 500 Watts from an inverter/battery-supply..... will they operate from a house ??

**Swiss Super Sound
Radio Madison**

Postbus 41
7700 AA Dedemsvaart
The Netherlands

The Satellite Broadcasting Company send a QSL-card together with an info-sheet. According to this, SBC is operated by two Germans namely Michael "Air" Klosinski and "Herby" Frank Herbers aged 23 and 18 years although programmes are transmitted via R. Eastcoast Commercial as we thought in RT 10. Herby is especially interested in R. Luxemburg (!!!??-ed) and hopes to work for that station some time in the future. As it is only mentioned that he likes 'critical comparison' between Free Radio and commercial/official broadcasting stations it is not known what his attitude towards RTL will be like when he'll work for them.... SBC's address is also the Dedemsvaart-one.

The name Frank Herbers leads over to R. Victoria (c/o Postfach 1214, D 6380 Bad Homburg, West-Germany). This DJ will present the "Musik, Musik, Musik"-programme transmitted each Sunday at 0800 - 0845 GMT together with Horst Garbe. It is also hoped that the station from now on will be heard on that day the programme has been made for... Several tests shall take place beginning on January 13 on 9810 kHz 24h a day via RMI with R. Victoria progs at usual times and repeated programme between 2000-0000 h. Also AWR and RMI itself will have tests during that period.

R. Waves Int'l, BP 130, F 92504 Reuil-Malmaison, Cedex, France had a transmission on 26-12-1983 on 6275 kHz. As I have been told, the OP just had picked up the rig from an engineer in the U.K. who built it for R. Waves.

And now over to some unpleasant news...

The Secretary for Trade and Industry in the U.K. has been asked what representations he had received concerning the operation of pirate radio stations. Mr. Alexander Fletcher says in a Commons written answer that representations have been received from the TBA reflecting the views of the independent radio contractors, from Capital Radio and from members of the public. Radiostations using the following names have been heard broadcasting on a regular basis in recent months: Alices Restaurant, Britain Radio International, Central Radio, City Sounds, East Coast Commercial, Floss Radio, Horizon Radio, JFM Radio, London Weekend Radio, Merseyside FR, Phoenix Radio, R. Amanda, R. Apollo, R. Caroline Int'l Radio Contact, Radio Enoch, R. Free City, R. Freedom Int'l, R. Gemini, R. Invicta R. Jackie, R. Lynda, R. Nova, R. Sovereign, R. Sunshine, Skyline R., Southern R., Uptown R., Weekend Music Radio. Quite a number, isn't it? If you like to hear a comment on that, tune in to R. ECC on January 7 1984 (Saturday) on 6226 kHz, I should think. Perhaps Neal West will have further news about that, too.

Having closely to do with this is the following :

R. Eastcoast Commercial and Britain Radio Int'l no longer have a mailing address !! Please do not write to these stations anymore !!

The 32 Victoria Road-address is no longer available to any station.

The same is valid for the 3 Rosewarne Cottages-address. They close on January 15, 1984.

A new address has UK-Radio: P.O. Box 143, Wolverhampton, U.K.

That's been all for today. Thank you for the numerous contributions ! The next deadline is January 17, 1984. Write in ! 73+FFFR, RADIOTELEX

The material contained in RADIOTELEX is free for any FR-magazine or DX-programme provided credit is given to RADIOTELEX.

17-1-1984

Hi,

a very good day to you and welcome to the new RADIOTELEX. This issue informs you on latest changes in the Free Radio scene, especially those on shortwave to be precise and offers a log section as well as a QSL-corner to form a base for the mag as usual. Here are some points of importance for those of you who are new to RT:

*News and information having anything to do with Free Radio are welcome of everybody (also of YOU!) * RT offers a SAE-service (you can buy stamps of several countries to send a Stamped Addressed Envelope along with your reception reports - write in for info! *Also, the RT-address-service is open to FR-stations which need a contact to their listeners (more on that later on in the issue!).

At first, here are the LOGS, time's in GMT.

HAPPY READING !

NEWS

Here are some adverts and special offers. Let's see:

-LS, Lautsprecher, German FR-mag costs 2 IRC or 1,50 DM in mint stamps. No.13 is just out and we shall inform you that LS now uses its own address: c/o P.O.Box 433, D 2980 Norden, West-Germany. The RT-address can only be used until the end of April !

-R.CLGC, Clandestine Listener's Club Germany, looks for a DJ to present programmes in German, Dutch, and English (also 'multi'-lingual DJ !!) lasting 60 minutes. Please contact: CLGC, c/o Wilfried Meyer, P.O.Box 540 101, D 4100 Duisburg 11, W.-Germany.

-What about your own sticker ? RT offers you stickers (same ones as RT-stickers, see page 1 at bottom !) for the smashing price of DM 25 (W.-Germany) or the same amount of money as the subscription-rate of your country shown on top of page 1. The price includes: 500 stickers as described, white with black letters, self-adhesive (5 lines with 30 letters per each line is the maximum capacity) as well as postage and packing. Post your order today and don't forget to send the words that shall be printed, hi! Send it, together with the money in banknotes, please, to RT, c/o P.O.Box 700 825, D 2820 Bremen 75, W.-Germany.

-R.Marabu Int is a new station which plans to be on via relay(s) on SW soon. RMI uses the RT-adr!

The circumstances arising in the U.K. had some effects on forwarding addresses recently. As reported, 32 Victoria Road and 3 Rosewarne Cottages (from February !) are closed and also the usage of the good old P.O.Box 319 at Edenbridge is not totally ensured. Sad. The following stations from now on use the RT-adr (c/o P.O.Box 700 825, D 2820 Bremen 75 in W.-Germany). Please always put only the abbreviation of the station's name on the envelope. These are: R.Apollo Int (RAI), R.49 Int (R49I), R.Batida (RB), R.Marabu Int (RMI), and R.Pacific Int (RPI).

R.Apollo Int looks for used studio equipment such as turntables and tape-decks for re-equipping the studio. The best offer would be from the U.K. to avoid high shipping costs. Contact Dave Scott c/o RT-adr.

R.Albatros was heard on Dec 26, 1983 as reported in the log section of RT 12/84 on around 7350 kHz playing mostly chart-music with announcements in English only mentioning their adr Postbus 41, NL 7700 AA Dedemsvaart, Holland. It's not known whether Albatros plans to return.

R.Nobody is new to shortwave since lat Sunday, Jan 15. They transmitted on 6273 kHz with a power of approximately 80 Watts. Nobody's address was not properly understood but was noted as Potbus ...?, NL 7360 Beekbergen, Holland.

From Italy, the following stations are active or planning to be soon. In the 31 m-band: R.91 on 9845 kHz and R.Europa Int on 9420 kHz. 41m is represented by R.Spoleto Int with the address Vicolo Volusi 1, I 06049 Spoleto, Italy on 7140 kHz with 150 Watts daily.

(FRSH-DX + RV-PR 2/84)

Atlanta R(c/o P.O.Box 319,... see before !) now offers an "Atlanta R. Story"-cassette for £ 2 or 10 IRC. Atlanta returned Jan 1 on 6290 and 6240 kHz including a FR-Newsdesk. The station is celebrating their 5th birthday this month.

R.Jackie is said to run now with reduced power of 40 (formerly 150) Watts on 1584 kHz. 24 hours a day, 7 days a week.

The Voice of Peace was reported off the air due to storm damages. However, the station is back now, audible with a fair signal around 0100 on 6239 kHz as heard in early January.

Although R.Caroline SW had its farewell transmission in Oct '83, Freddie Archer says now that he'll pop up from time to time on the 48m band as on Jan 1 when using 6230 kHz (I wonder if that was a relay or a prog via Freddie's own transmitter-his normal 6310 kHz is now used by another station, namely...

...R.Ireland Int which used to transmit on 6310 kHz nearly every week lately will take a rest for the next few months to get better transmitting equipment.

Norman Nelson of R.Eastcoast Commercial (ECC) is still intending to operate without an address for the time being as he feels this is the safest thing to do at the moment. Please don't write to RECC anymore !!

A strange thing is the harmonic-frequency of Storeton Community R. from Merseyside on 2592 kHz which is two times 1296 kHz !! The signal has been observed to be quite strong on shortwave, worth trying ???

And now over to the rather unusual sector of Free Televison. Telstar TV is a TV-pirate in the Birmingham-area and used to go out on Friday-nights on the same channel as BBC TV 2 (channel 40) after they'd gone off. Presenter John Taylor and technician Steve Collins use a small TV-rig to cover the Rubery and Northfield areas of B'ham with mostly horror-film and popmusic videos. Last week they stopped transmitting for 1 or 2 weeks to avoid detection by the Government's Radio Interference Service because when they get raided they'd be fined £ 1000 and their equipment would be confiscated. Telstar's accomodation address is: 151 Dudley Road, Winston Green, Birmingham B18 7QY, U.K.

R.Nova from Leicester and R.Sovereign from London have both closed down transmissions due to the increased TELECOM-activity. R.Nova therefore now offers their whole studio-equipment for sale.

Another address for FR-stations is the one of the Dutch R.Enterprise, c/o Postbus 19074, NL 3501 DB Utrecht, Holland. R.48 from the U.K. will be the first station to use this contact as mailing address for future transmissions.

Talking of addresses again, R.Avalanche is waiting for the new P.O.Box in Salisbury to open soon. The new address shall replace the 32 Victoria Road service of SPECTRUM, part of AIRSPEC NEWS, a U.K. FR-mag.

The new TELECOM-law which, amongst others, should make it more difficult or at least impossible for a FR-station to use an accomodation address within the U.K. will come effective from February or March 1984.

R.Batida has left the 48m band now and will tranmit between 7320 and 7364 kHz (41m) in the future. A new QSL-card has been issued which shows a photograph of the DJ Michael, a possibility to see who's behind R.Batida. It will be send to everyone who sends in a correct reception report. Batida's adr is c/o RT-adr.

No sign has yet been heard of R.Laser 730 the planned offshore-medium-wave-pirate situated in the Thames Estuary.

R.Nova, this time the Dublin-one, can be heard over the day in N.-Germany on 819 kHz mediumwave. It's not known what power they use at the moment (50 kW ??). Nova recently tried to set up a Free TV station but all the devices were confiscated before the station even went on the air.

Staying in the Republic of Ireland, South Coast R. is being jammed by RTE, the state broadcasting authority, on both AM and FM, 1557 kHz + 104 MHz. Other stations in Cork are unjammed at the moment. Eastside R. Ireland is probably unjammed because they are too close to RTE-2-, the state 'pop'-channel.

R.Neptune/Cambridge (ref. RT 11/83) has the following mailing address: 2 Lawrence Road, Eaton Ford, St. Neots, Cambridgeshire, U.K. They were last heard on Dec 18 on 7365 kHz, quite an old 'bit'...

R.49 Int will be on the air one more time in January (on a Saturday) using the old address c/o 3 Rosewarne Cottages, Rosewarne Downs, Near Camborne, Cornwall TR14 OBE, U K. You can use this adr only until the end of January, then they will switch to the RT-address !!!

The Spectrum World Broadcasting has the following mailing address: c/o 134 Eastworth Road, Chertsey, Surrey KT16 8DT, U.K. The station seems to share transmitter with R.Krypton regarding address and frequencies used.

...leading us to the last point of the news-section:

R.Victoria.....-queen of the airwaves- ???!!!

RV-PR 2/84

Starting in this issue and lasting as long the material allows, hi, is a list of FR-stations sent in by Neal West of ECC-DX. The co-operators are mentioned in the following: Neal West, Podney Sixe, Tim Jackson, Morris Walker, Ken Baird, Keith Rogers and RT. Reported in 1983:

ABC Radio (Dublin + Tramore), Andromeda Independent R., Atlanta R. Black Country R. (West Midlands), Boyneside (Drogheda), BRI, BBMS, Bulldog R. Capital R. Int, Central R. Int (Merseyside), Channel R., Channel 5 R. (Merseyside), Coast Sound R., Comm. R. Fingal, Comm. R. 257 (Dublin), County Radio Douglas Valley R. (Wigan), Eagle R. (Merseyside), Eastcoast R. Int, East Midlands FR Service, Eastside R. -ERI- (Cork), EST (West Midlands), Emerald R. Int, Empire R., European MR, Free R. Lancashire, FRSH, KBC R., KDA R. (Merseyside) KISS-FM (Dublin), KLA R., Liverpool Pirate R. (continues)

Well, that's it for today. Please write in for RT 14/84 which shall be out on Januray 31, 1984 (DEADLINE). Also note that any mag or FR-station might use RADIOTELEX -material provided RADIOTELEX is mentioned !!

Bye for now,

RT

13/84

31-1-1984

Hello there !

Welcome to another edition of RADIOTELEX, the fortnightly Free Radio magazine (26 issues per year, subscription rate for your country see above !). As there have been some alterations recently concerning FR-addresses, here are the main changes again:

- Without a mailing address at the moment are BRI and ECC (see also news !) as well as almost all stations which formerly used the 32 Victoria Road-service that is closed for some time now.

- New mailing addresses for the following stations:
R.49 Int (R49I) ; R.Pacific Int (RPI) ; R.Apollo Int (RAI) (also uses P.O.Box 319, Edenbridge,...!) ; R.Marabu Int (RMI) and R.Batida (RB) as well as BBMS when they return to the airwaves. PLEASE: Do remember to use only the initial letters (those in brackets!) when writing to these stations at Postfach 700 825, D 2820 Bremen 75, West Germany.

-Lastly, another accomodation address is c/o Postbus 19074, NL 3501 DB Utrecht, Netherlands. So far, R48 uses this address ...(...which is of the Dutch R.Enterprise!)

On with the loggings, time's GMT:

Republic of Ireland

NEWS

Storeton Community R., 30 Bridle Close, Ford Estate, Birkenhead, Merseyside L43 9UU, U.K., a station we reported about in RT 13 is said to emit a "very very strong" 2nd harmonic on 2592 kHz which is well audible in most of Europe and even beyond: SCR is a seven-days-per-week FR-station from Merseyside on 1296 kHz.

Spectrum World Broadcasting gave their schedule as follows in one of their transmissions recently: every Sunday, 0830-1030. Frequencies observed so far: 6270, 7318 + 7710 kHz... continues

SBC's address is c/o 134 Eastworth Road, Chertsey, Surrey KT16 8DT, U.K.

KLA-R. from South-England now uses 6243 kHz in parallel to 8029 (!) kHz as it seems. This information was given by Spectrum WBC on their Jan 22 transmission. KLA's address is c/o 16 Windmill Lane, Long Ditton, Surrey, U.K.

BRI has temporarily suspended their newsletter which used to appear 6 times a year. The German service is scheduled now every 4th Sunday of a month at 0930 GMT; however, for some reasons there was no German show on Jan 22, so the new DJ will appear probably in February. The station is still without a mailing address.

And again news (rumours ?-ed) about the offshore-project Laser 730: On Jan 21, a station presumed to be R.Laser 730 has been heard testing on 729 kHz playing non-stop Beatles-music from just before 1200 right through into the evening. The special thing about Laser 730 and as well the reason for not resuming transmissions so far is their antenna system: Laser 730 uses a helium-balloon which carries the antenna at a height of 120 metres ! They already lost 2 balloons due to heavy storm and are now waiting for a new one. The ship is equipped with two transmitters of 50 kW each which can either carry 2 different programmes on two different frequencies or be switched together to deliver a power of 80-100 kW. Laser 730 will also hire time on their second channel. One thing to add to the Melody Maker-clip of Jan 21 (see beneath !): BBC R.4 is listed on 720 kHz for Lisnagarvey, Londonderry and London and only RTE 1 from Ireland has an outlet on 729 kHz. Strange.

Other offshore news:

R.Caroline now advertises products of 3 companies which are transmitted every 15 and 45 minutes of the hour. News on the hour is from NEWSWEEK, a magazine.

R.Nova from Dublin on 819 kHz now in fact uses 50 kW again.

The Free Radio Service Holland (FRSH) will start a feature on european landbased pirates of the seventies on February 19, 1984. Tune in !

R.Nobody (see RT 13 !) with the complete address Postbus 102, 7360 AC Beekbergen, Netherlands uses a Collins CWS 52245-transmitter with an input of 110 Watts and an approximate output power of 75 Watts. This station from Apeldoorn is on the air with a 22 metres longwire antenna and the operator is aged 24.

R.Apollo c/o P.O.Box 319, Edenbridge, Kent TN8 6QE, U.K. or, for continent listeners c/o RT-adr plans to be on February 5, next Sunday, with half an hour Dutch, 30 minutes German, 45 minutes APOLLODX (worth listening to !) plus a guest DJ show of Mr. Bluesky of R.USA (P.O.Box 5074, Hilo, Hawaii 96720, USA) which will last 30 min as well.

A relay of that station R.USA is also planned. Apollo will most probably use 7325 kHz because 7330 kHz is too disturbed at the moment.

Attention: The R.USA-tape is low-levelled so be all ears !! This will probably be a co-site broadcast with R.48. If R.48 does not appear this Sunday (5th) they should be on the following (Feb 12). The reason for Apollo not receiving mail from P.O.B.319 until mid-January was that the OP of that address was so drunken on Jan 1 that he put a false address on the envelope determined for Dave Scott leading the letter to Scotland first ! After the mail was returned, your letters will have been answered by now !

CAROLINE TUNES IN TO A RIVAL

ANOTHER pirate radio ship has arrived in the Thames estuary to join Radio Caroline. Radio Laser, has set up shop aboard the Gardline Seeker, and will start transmissions shortly.

But the BBC has warned Laser that its broadcast frequency is similar to Radio Four, and there are fears that Laser may disrupt BBC programmes. The Corporation plans to monitor any broadcasts and will complain to the Department of Trade if there are any problems.

Radio Laser is thought to be backed by American money, and will have a top 50 singles format. First rumours of the new station started in November when "Laser 720" was said to be setting sail for Britain from Florida.

Radio Caroline has welcomed its new rival. The two stations are aiming for different markets (Caroline specialises in album tracks).

R.Titanic Int received only 2 reception reports for their Christmas transmissions in 1983 and the staff decided to be on the air only occasionally - due to bad response from the listeners- 3-4 times per year in the future on the 48,41 + 26 m bands from different countries in Europe. A test on 11400 kHz is planned to take place soon checking out the conditions up there. RTI is on the air since 1975 and received more than 500 reception reports so far. RTIs address is c/o Postbus 41, 7700 AA Dedemsvaart, Netherlands. The station's history is free for a correct reception report + IRC.

Sunrise R. from Sweden which originally wanted to go out on the air over Christmas now hopes to be on 11416 kHz 'starting at either 0900 or 1000 GMT on Feb 5. Scheduled is the first Sunday of each month Sunrise use the same address as Titanic.

The Voice of the Leek now definately has its US-test on Feb 19 between 0600 and 0730 GMT. Although a lot of people thought that a 48m channel might be better, Idris Evans will be on 7373 kHz (41m) and hopefully will make it across the Atlantic ! Remember that the VotL is Wales' only FR-station left ! Contact them via the Edenbridge-thing !

In addition to the news-item in RT 13, R.Nova from Dublin, the Chris Carey enterprise, is jammed by the state network RTE since Dec 16, 1983. Jamming over the Christmas period was on irregularly mainly during peak listening times, 0700-1900 GMT. Since the closure of Nova's sister station, KISS FM, jamming has become more constant. On Thursday, Jan 19, RTE jammed all frequencies between 88 and 106 MHz wiping out all, FM-pirates in Dublin along with the incoming signals from U.K. ILR/BBC stations !! Overseas 'legal' radios are also affected by the high test-pulse tone from RTE.

/ANORAKS IRELAND

BBMS, Britains Better Music Station, has closed down the Fleet Street address and now also uses Postfach 700 825 in D 2820 Bremen 75. Remember to put only 'BBMS' on the envelope, please.

The station itself still has problems with the two transmitters which had broken down last autumn and now would like to sell them to buy a new rig. As far as we know, only the Power Supply Units (PSUs) have to be repaired, no difficulty for an experienced FR-OP ! The price is £ 40 each or nearest offer including a crystal for 6 or 7 MHz and the collecting point would be Central London (nothing other possible !). Description of the rigs: ECC 83, 6V6 into an 807 are the valves, output-power around 15 Watts. Contact Gary Stevens via the above address ! They also ask if anyone could make them a VHF/FM studio-link-transmitter and at what price, frequency, etc...

Italy

The following is reproduced from material by Dario Monferini of PLAY DX:

- Relays of Radio Rete Manila One on 7215 kHz in LSB come from a shop selling transmitters. The relays are made with 100 Watts and without permission of R.Rete Manila, the reason for that station not to confirm any report sent to Via Leyni 40/F, I-10100 Torino, Italy.
- Radio 91 is operated by a 16 year old boy on 9845 kHz with a power of only 10 Watts. Address: c/o Via P.Giovanni 23, I-11645 Travaco 3, and nothing is known about the 800 Watts mentioned in another German FR-mag.
- R.Marilyn (9975 or 11645 kHz) has never been active on SW nor do they own a SW-transmitter. c/o Via Andreini 3, I-40127 Bologna.
- R.City Int Lecce on 15030 kHz or 25920 kHz with a power of 1 kW, financed and operated by the SW Listeners Club Switzerland, SLCS, is presumed to be a joke ! (Lecce=Milk ???!-ed)
- Finally, R.Spoleto Int reported in RT 13 on 7143 kHz has been reported now with a different address: C/o Piazza Garibaldi 17, I-06049 Spoleto, Italy.

And that finishes RT 14. Write in for the next issue and keep on with your FFFR ! RADIOTELEX-material is open to DX-bulletins and programmes provided RT is mentioned !

14-2-1984

Hello YOU !

Here we are again with no. 15 of RADIOTELEX - the "2 sheets/4 pages collection of Free Radio news". Unfortunately, in our last edition we forgot to mention the deadline for this issue. As a matter of fact (...and in order to not forgetting it again...) here is the deadline for no. 16: February 28, 1984, a Tuesday as usual.

Also back on our 'normal' typewriter, things should look some kind of more familiar again. Let's go on with:

FR-LOGBOOK

(times are GMT !)

NEWS

To talk about mailing addresses again, here is the latest info on that important matter:

R.Eastcoast Commercial (R.ECC) uses the RT-address since February 11. Please, if you hear them, send them a letter at RECC, c/o P.O.Box 700 825 in D 2820 Bremen 75, West Germany. For much more news listen to the ECC DX-programme - 1st Saturday in the month on (most likely) 6226 kHz and repeated on 2nd Saturdays in 26m band on 11584 kHz. Officially, programme commences at 1000 GMT but recently there is so much information that the prog often starts earlier at 0930.

KLA R no longer has a mailing address available due to the new TELECOM-law. Despite this, they intend to stay on the air on either 8029 kHz or 7570 kHz as they caused little interference to CHU, the Canadian Time Signal station. KLA has been heard most probably on 6243 kHz lately using an echo-chambered signal (see logs !). The DJs remain as Brett Sinclair, Conrad Turner + Tony Symons along with Yvonne who answers the mail (they are looking for a new address now...perhaps c/o RT in the near future ?...)

R.Pacific Int is a station that plans to be on in the near future via different relays that have been sorted out now: either via the transmitter of R.Waves Int on 6275 kHz, or via R.Delmare on 6206 kHz, or via the Irish Eastcoast R. Int on 6210 kHz. R.Pacific Int can be contacted via the RT-address using RPI, c/o....,please.

R.Apollo Int now has two mailing addresses available: The 'old' P.O.Box 319, Edenbridge, Kent TN8 6QE, U.K. and RAI, c/o P.O.Box 700 825 in Bremen. Apollo has been on Feb 5 on 7330 kHz after finding out that 7325 was too disturbed due to RTTY. After the Dutch, German and APOLLODX programmes, the batteries of his recorder had ran out so that he unfortunately had to close down the transmission after relaying BBC R.3 for 10 minutes just to inform the listeners that he hadn't been raided...! The rest of that programme will probably put out next Sunday, February 19, 1984 on, I think, 41m including a 45 min chat prog with Mike Davis/Dave Scott. Remember that Apollo's sister station Voice of the Leek (c/o Edenbridge only !) will be on 7373 kHz between 0600 and 0730 GMT the same day from a site in Wales ! Reports are highly appreciated for this US-test.

R.Xanadu plans to re-commence programmes in 2 weeks time.

R.Rastafari, Postbus 162, Bommel, Netherlands, returned after a long absence - this time via R.Delmare on 6206 kHz. The station says that they will be on the air every 1st Sunday of each month via Delmare starting at 1100 hours.

R.Time, C.P. 79, I 50018 Scandicci, Florence, Italy, has been testing on 7105 kHz the past few weeks with their new 3 kW transmitter. It is said that the station is also on 6145 kHz with 1 kW of power all day long. According to R.Victoria there will be a low-powered mediumwave-transmitter soon (on either 1386 kHz or 1395 kHz with 40-50 Watts).

World Music R., Postbus 4078, 1009 AB Amsterdam, NL, is no longer broadcasting via R.Milano Int. It seems that the FM and MW outlets of WMR (relays) have been ceased since the SW transmissions via RMI were not on the air for some time.

Meanwhile, the 'false' WMR, Postbus 828, 5900 AV Venlo, NL, has taken over the Belgian R.Benelux (BNL, 103.3 MHz / FM) - no connection with the Radio Benelux on shortwave ! So, we probably won't hear this WMR again on 48m...???

KBC R., Postbus 725, Arnhem, NL, has just issued their first newsletter for 1984. Their next transmission is scheduled for March 3 beginning at 1100 on 6205 kHz. The programme will be presented by Tom de Wit who also signs the QSL-newsletter. It is also planned to broadcast on March 4 on the frequency of R.Time (7105 kHz !!?) 0300 - 0400 GMT. Maybe a test to North America ?

Weekend Music Radio, c/o 42 Arran Close, Cambridge, U.K., has so far not received any reports for their tests to North America. The station planned to transmit on 15045 kHz January 29 at 1200 and 1400 for both an hour. It seems the frequency range below the 19m BC-band becomes quite popular for transatlantic pirate radio as the US-pirate "The Voice of Tomorrow" (P.O.Box 786, Bristol, VA 24203, USA) claims to use 15040 kHz from time to time.

R.Waves Int, B.P. 130, F 92504 Rueil-Malmaison Cedex, France sent some information to RADIOTELEX which are given to you in the following: RWI started on November 13 last year on 6250 kHz which resulted in poor reception but it was the only crystal they had at that time ! Until now, many reports arrived in France with 50% from W.-Germany, 45% from the U.K., and 5% from the other countries in Europe. The transmitter was built in

the U.K. and delivers an approximated output power of 18 Watts. The antenna is a dipole and the sites change all over France for their own security.

R.Mirage is a new station from the British Islands. They tested their new transmitter on Feb 5 on 6217 kHz with own programming between 0900 and 1000 followed by a relay for R.Confusion from Norway (their final programme, despite the new address P.O.Box 2778, Elverhoy, N 9001 Tromso, Norway !) that lasted 1 hour. The transmission gave no contact-address yet but they are supposed to use the new Salisbury- P.O.Box-service when it appears. R.Mirage hopes to be the first playing all electronic (serious !) pieces of music on shortwave, so it won't be all Yazoo, Depeche Mode, etc... but more likely pieces a la Jean-Michel Jarre. I wonder if they derived their name from a piece of Jean-Luc Ponty...?

R.Avalanche would like to apologise to all people who have not yet received replies from the station for their 1st birthday transmission. However, they won't reply to any mail until they have the new P.O.Box. This mostly applies to people who sent in tapes- they had a few studio problems and didn't manage to get them out in time. Avalanche's next BC will probably last 3 hours with DJs Phil Abbot, Danny Kay, Jayne, and a relay show of their American sister station KQSB. Again, this will not happen until they receive details about the new address (Salisbury).

Britain Radio Int was not on the air January 29 due to transport problems (Roger's car wouldn't start !). They put out all shows on Feb 5 on 6225 kHz. They have no address at the moment.

Here are two adverts on other FR-mags, firstly on

LS-LAUTSPRECHER, c/o Postfach 433, D 2980 Norden, West Germany. You'll receive a sample copy of this bi-monthly magazine for 2 IRC or DM 1,50 in stamps.

ASN - AIRSPEC NEWS is now also on a bi-monthly basis, for more info see this sticker (which are free if you write to them !):

Eastcoast R. Int appeared several times on shortwave this year but they don't seem to have a regular schedule at the moment. They are usually on 6210 kHz and the address to write to is: 24 Joyce Road, Drumcondra, Dublin 9, Republic of Ireland.

/APOLLODX

R.48 Int has changed their address (as reported in RT 13 + 14) and are now experimentally using Postbus 19074, NL 3501 DB Utrecht, NL. They had a successful transmission (as far as the reception quality goes) on February 12 on 48 metres.

/APOLLODX

QSL

At the left,
you can admire the new
Batida-QSL.

Please remember the deadline (front-page!) and take care !

28-2-1984

Hi !

Here we are back again with RADIOTELEX. By the way, anyone who thinks that these two or three sentences look almost the same in every issue, is invited to send in proposals for "another headrunner", hi ... Contributions (i.e. logs, news, and other Free Radio material available) are not too numerous but still are not zero, in other words: Please write in next time !! ALSO YOUR material is important ! The deadline is March 13, 1984. Your letters should be here in Bremen by that date so remember to mail them about 4 days before that deadline especially when you are writing from outside Germany. Thanks a lot for keeping it in mind.

These first sentences have often been used to advertise the special RADIOTELEX-offer of the SAE-service. To make it short in order to not boring people who know about it already I'll try and make it understandable in a few words: You can buy mint stamps of those countries a FR-station is transmitting from. You do this either by sending equivalent stamps from your country (exchange rates upon request... perhaps together with your latest loggings ???) or in a way we could discuss then. When you are going to write to that station you simply enclose a Stamped Addressed Envelope, that is an envelope with your address and the stamps you bought on it, to your report and the station can answer your letter more quickly because there is no need for the operator to buy envelopes and to exchange IRCs. Well, good idea ??

NEWS

R.CLGC has been heard on February 25 at 1330 via the transmitter of R.Delmare on 6207 kHz with a German programme. The station is also heard via Music R.Holland in English and Dutch between 1100 and 1200, and in German the following hour every 1st Sunday of the month. Usual frequency for MRH is 7315 kHz. CLGC's address is c/o P.O.Box 540 101, D 4100 Duisburg 11, West Germany.

The next broadcast of R.Apollo Int will be on either March 11 or 18 and the transmission will most probably include an interview (or various...) with Robbie Dale of Sunshine R.Ireland. Apollo's usual frequency in the 41m band is 7330 kHz and a new info-sheet issued recently tells that the ARN- Apollo Rely Network - will return soon. Apollo now has two mailing addresses, just to remind you, the P.O.Box 319, Edenbridge, Kent TN8 6QE, U.K. one and, more convenient for continent listeners, c/o Postfach 700 825, D 2820 Bremen 75, West Germany. Please remember to put only RAI on the envelope !

R.Nova from Ireland is said to most probably go off the air the coming weeks due to severe jamming from RTE (as reported earlier in RT). Also, Chris Carey has fired 30 DJs and these are now posting pickets (Streikposten) at the studios. It is thought that Nova will be replaced by a station called Dublin Commercial R. operating on mediumwave with a power of 200 kW. This transmitter still has to be purchased in the USA. Joining the problems of jamming, also advertisers on Nova now left that station. 819 kHz is still in operation, KISS FM on 88 MHz is closed.

The operator of Capital R. (Ireland) has had a car-accident recently the reason for the station not being on the air for a few weeks. But as it seems, Capital tested again on 6268 kHz, their usual outlet, last Sunday, February 26 so they should be back on 'normal' the next time. Their address is North Street, Swords, County Dublin, Ireland-

Letters to Britain R.Int, BRI, can be send to their former address c/o 32 Victoria Road, Salisbury, Wiltshire SP1 3NG, U.K. again ! Quite confusing as this one closed some time ago for security reasons but you will not receive any answer on your letters unless the new Salisbury-P.O.Box number has been obtained ! So, let BRI know that you've heard them O.K. Sometimes it's even more helpful for a station to know that it is heard instead of getting "just another report wanting a QSL". The normal schedule will turn to normal in March including a new issue of the BRI-newsletter and the German programme returning on March 25 at 0925 on 6225 kHz.

The address of R.Brigitte from Belgium which was heard on Saturday (!), February 25 on 6235 kHz has changed a bit: Brigitte van Gelder, Postbus 10, N1 7954 ZG Rouveen, Netherlands. Don't put the station's name on the envelope !

R.Batida, c/o Postfach 700 825, D 2820 Bremen 75, West Germany has introduced a new programme called "Hörerbox" (Listener's Box) in which listener's letters are answered and read out. The station is on the air from time to time for 45 minutes only due to security reasons.

KBC-Radio, Postbus 725, Arnhem, Netherlands, will make use of the transmitter of R.Delmare starting next Saturday, March 3, 1984. from 0800 to 1000 according to Johan Rond of Delmare. Frequency is - as usual - 6206.5 kHz.

News about R.Laser 730 are as follows: The station was heard on 729 kHz mediumwave on February 19 with Stephen Bishop together with an American DJ and signed off at 1600. They said that they are busy constructing a new mast at the moment and when everything goes O.K. they will be back on the air (probably on a higher frequency) in 10 days to 2 weeks time, being at the beginning of March. It seems that the idea with the helium-balloons wasn't a good one though it is thought that new ones are purchased at the moment. Laser's address is: c/o MMI, 341 East Madison Avenue, New York, N.Y. 10017, USA.

The address of J-FM which is being relayed each Sunday the last weeks on 7710 kHz via R.Krypton's transmitter (probably, well, most...) is 2 Mitcham Road, London SW17, U.K.. Who will write to them and tell them about this relay, perhaps they don't know it already ???

Many things have been written about the new TELECOM-BILL. Here is the latest stuff on it:

It is reported that this new Bill has received the first reading in Parliament and that it is likely to become law by June or July 1984 when the authorities intend to clear all frequencies of all unlicensed users.

Well, that almost exhausts the stock of information this time. Please write in for RADIOTELEX no. 17 which will be out on March 13, 1984. Here is some kind of extraordinary QSL-layout:

13-03-1984

A very good day to you !

Here we are again with RADIOTELEX, the issue's number is 17.

It seems as if our appeal in the last issue has not had that much resonance of you, the reader, than we wished it would have; only the "everytime" contributors wrote in (for which we are most thankful...) but we would like to get even you mobile for Free Radio - and at least for sending in any news or logs to this information-sheet. Right ?

Starting with the loggings of the past two weeks, we are opening today's

QSL-CORNER

As it seems, QSL-post has been very little the last time as only one contributor sent in his item:

East Coast R.Int 6210 kHz 45 days 2 IRCs sent, QSL-letter plus personal letter received

So, here are some advertisements I've been told to print, otherwise.....hi.....!

ANORAKS IRELAND is the only free radio group based in Ireland and promoting Pirate Radio regardless of pending legislation for local radio stations. They also issue a newsletter which should be out every month. As I do not exactly know at the moment for what price and other conditions, send them about 2 IRC to receive a sample-copy of that bulletin and you will be informed on what's going on in Ireland.

AIRSPEC NEWS is an English Free Radio magazine which is out bimonthly and informs you on almost any event dealing with Free Radio (SW,MW,FM,...). Order your sample now at the conditions described on this sticker:

For just 10p & sae/2IRCs...
AIRSPEC NEWS - No 1 in the
UK! Send your money now to:
36 NOTTINGHAM ROAD, LOWDHAM
NOTTS. NG14 7AP in the U.K.
The latest Free Radio news!

ANORAKS IRELAND
310 Collins Avenue West
Whitehall
Dublin 9
Republic of Ireland

LAUTSPRECHER or LS do not have a sticker available yet but I think they will have some printed in the near future.

Anyway, their offer is a bimonthly Free Radio Mag which you can order by sending 2 IRCs to : P.O.Box 433, D 2980 Norden, West Germany. LS is in the German language.

The last Free Radio orientated bulletin I want to write about this time is the Danish **DDXLK Hobby Pirate List** which is issued 4 times a year (February, May, August, and November). The list costs 2 IRCs a copy of 7 IRCs for a whole year (4 copies).

Please contact the Dansk DX Lytter Club, Hobby Pirate List, P.O.Box 392, DK 8100 Aarhus C, Denmark. The editions include all reported stations listed by frequencies.

NEWS

From Anoraks Ireland we received an interesting letter which informed us about the shortwave activity from that island. This update is valid as of Feb 26, 1984 :

- 6210 kHz - East Coast R.Int is on every Sunday between 0700-1000 GMT. DJ and OP Martin Birney is looking for a German DJ at the moment who is able to produce 1 hour-shows /once a month in German ! The address to write to is : 24 Joyce Road, Drumcondra, Dublin 9, Republic of Ireland.
- 6266 kHz - Annabel SW from Central Dublin has no schedule as yet testing 1242 - 1306
- 6280 kHz - Westside R. Int from North Dublin is active on Sundays 1000 - 1300
- 6285 kHz - This is Mi Amigo R. Int from South Dublin broadcasting on Sundays 1045 - 1300 GMT
- 6317 kHz - This is the frequency for the irregular transmissions from Enterprise R/ West Dublin. When they are on, it'll be between 0900 - 1300 on Sundays as well.
- 6910 kHz - R.Dublin relay of channel 1 (AM) 24h daily
- 11463 kHz - is Westside R. Int testing to North America on Sundays 0800 - 0900 but irregularly, too.

Another thing Paul Davidson of AI wrote about is that there are harmonics of Diamond R. on 1556 kHz AM on 6210, 6226 & 3114 kHz. Diamond R. is heard 0900 - 2400 daily. We at RADIOTELEX would also like to hear more about the recent news about the return of Capital R 6268 whose OP had an accident recently as well as about the supposed signals of R.Ireland Int. on 6310 kHz last weekend.

KISS FM Dublin
"FOOL"
IF YOU THINK
IT'S OVER

Here are some important news about R.Eastcoast Commercial from the U.K. R.ECC vacated the 48m band on Saturday March 3 at approximately 0935 GMT to avoid being raided because the Home Office's "Raiding Party" had been seen in the transmission area that day and the station closed down for security reasons. Despite getting the station switched off early - all the equipment was found an hour later and everything was taken but no one was caught. This event follows other circumstances in which Norman Nelson's house was checked out about 2 weeks before March 3 by 2 unidentified men.

It is certain that R. ECC will remain silent for the next time and it is also thought that BRI will adopt the same policy. Sad. ECC's address remains as c/o P.O.Box 700 825, D 2820 Bremen 75, West Germany.

EST-Electronic Sound Transmission from Birmingham was raided at about 1300 whilst broadcasting to B'ham on FM 94.3 MHz with the station's gear taken and 3 of the staff caught. The raid was undertaken by 4 or 5 police cars and 2 Home Office people. But some days later EST was reported back to the air with a new transmitter on the same frequency and later changed over to 103 MHz. The shortwave relay is probably suspended for the time being.

Here is some OFFSHORE information:

It is not clear yet if Laser 730 is on regularly now - here at the editors QTH nothing is audible on the stated 729 kHz. Also whether a new frequency will be used is not certain.

R.Paradijs is expected to return shortly to the North Sea.

KLA-R. now definitely have a new address: c/o P.O.Box 19074, NL 3501 DB Utrecht, Netherlands. They plan to be on regularly between 1100 and 1200 GMT. No exact frequency details are yet known.

Sunrise R. from Sweden with the address c/o Postbus 41, NL 7700 AA Dedemsvaart, Netherlands has re-introduced regular transmissions containing a soul/funk - format every 1st Sunday of the month between 1000 and 1100 GMT on either 11400 or 11416 kHz. The station asks its listeners to record jingles (!) for Sunrise Radio to improve their programmes.

R.Krypton will celebrate their 5th birthday with a special broadcast on March 18. They are currently transmitting two or three times a month on Sunday mornings between 1100 and 1300 GMT on 6265 and 7710 kHz. Krypton's address is : c/o 134 Eastworth Road, Chertsey, Surrey KT16 8DT, England.

Beginning on March 12, R.Victoria will be relayed by the Belgian FM station R.Benelux (BNL) on 103.3 MHz. Transmissions will go out every Monday and Tuesday night between 2000 and 2400 and programming will be the repetition of the broadcast via R.Milano Int the weekend before.

Last Sunday, March 4, the first programme has been heard of R.Marabu Int a station without an own transmitter. The programme was relayed by R.Waves Int, a French station on 6275 kHz between 0955 and 1025. Another relay is planned via East Coast R in Ireland but a certain date is not fixed yet. R.Marabu's address is c/o P.O.Box 700 825, D 2820 Bremen 75, West Germany.

Another station which can only be heard via relay-transmitters is R.Sunday Int. Now the time has come for another broadcast and RSI will be heard via R.Apollo Int in the near future but the exact transmitting date is not known so far. RSI is another station which uses the RT-address service (Please, only put RSI on the envelope !)

Dario Monferini, infamous DXer ... is part of a sentence Roger Kirk of R.Victoria printed in his so-called 'pressrelease' no. 7/1984. 1. Some time ago R.Kirk promised RADIOTELEX that he never again would send such a pressrelease. Unfortunately, he broke this promise as we can see above. 2. We like to apologise Commander Kirk's behaviour towards Dario Monferini as 'infamous' is the wrong word here. Or isn't it, Roger ? Click.Over and out.

The last clip of paper received tells me about Music Radio Holland. This station announced to be on the air every 2nd Sunday of the month. The usual frequency can be found in the 41m band, 7317 or 7364 kHz are most probable. Their address is: 151 Beumesweg, NL 9661 AE Alteveer, Netherlands.

And that concludes this weeks entertainment for Free Radio fans. Or isn't that a proper description ? Until next time with 73's and Fight For Free Radio,

RADIOTELEX

27-03-1984

Hello there !

"You are listening to RADIOTELEX which offers you information on Free Radio, especially dealing with the shortwave part of it. Please enjoy the current loggings, a 'quite nice' QSL-corner, and a (hopefully) more informative news section than we had in RT 17. As we like to supply information on a fortnightly basis, it often is difficult to go along with 'smashing items' all the time. Stop the excuses ! Before we open the logbook, here is our next deadline : April 10, 1984."

NEWS

Time is GMT !

Sunshine R from Ludlow in Shropshire is about to start also transmissions on shortwave operating with 2 (two !) outlets on 41m (7325 kHz) and on 49m, using most probably 6150 kHz, an in-band frequency ! As Sunshine has agreed to close for good when the new Telecom Law comes in, this station will no do all that is possible until they close. The broadcasts are parallel (//) to mediumwave (or: will be) and, as a matter of this, 7 days-per-week ! Sunshine's address is P.O.Box 299, Ludlow, Shropshire, U.K.

The UNID of March 11, 1984 on 7400 kHz has turned out to have been R.Nolan Int broadcasting their long awaited "digital" transmission. Reports are welcome to Postbus 11, 9540 AA Vlagtwedde, Netherlands.

R.Freedom Int announced in their 18-3- broadcast that due to the fact that the new Telecom will soon be enforced they have decided to close. Their final programmes will be (or have been) broadcast on Sunday 25-3- at 0800 and Saturday 31-3 at 2000 on VHF/FM after RFI will close for good. The station first broadcast tests in 1973 with regular Sunday programming in '74. After a raid in '75 RFI were silent until 1980 when a few transmissions were made but it was '82 before regular transmissions started and continued until now. Anyway, here is their address: Dept. R, 67 Elm Row, Edinburgh EH7 4AQ, Scotland.

Also the future of Atlanta R. (c/o P.O.Box 319, Edenbridge, Kent TN8 6QE, U.K.) is uncertain due to the new legislation. A final decision has not yet been taken but they hope to continue in the future. Time will tell us ...

Britain Radio Int or BRI still uses their old 32 Victoria Road - address and in fact is replying to letters as one contributor wrote. Despite their announcement that they wouldn't send any letters until the new Salisbury P.O.Box number comes effective (When ?) they did. Hmm. It seems that the station will keep to their current format with transmissions every 4th and 5th Sunday of the month despite the heavy pressures.

Radio 101 from Germany with the address 'Postlagernd', D 4180 Goch 3, West-Germany, tested on 7450 kHz quite often recently during the late morning and afternoon hours (refer to the logs at the beginning of the logbook !-ed). The station has an approximate output power of 50 Watts and transmits in FModulation which results in a slightly distorted audio quality. They hope to introduce a new transmitter soon with 1 kW of power.

The operator of R.Waves Int (B.P. 130, F 92504 Rueil-Malmaison CEDEX, France) plans to start a mediumwave station in the near future. Meanwhile, RWI continues to appear quite often on 6275 kHz also relaying R.Pacific Int (formerly c/o RT-address, now via the above R.Waves-address !!!) and R.Marabu Int (c/o RT, please use RMI on the envelope only !). Alternate channels for Waves are 6225 and 7340 kHz.

The current schedule of R.CLCG, Postfach 540 101, D 4100 Duisburg 11, West-Germany, looks as follows:

2nd Saturday of the month via R.Delmare 1400-1700 on 6207 kHz, 2nd Sunday via Groene Specht R. on either 1610, 1625, or 1638 kHz 0000 - 0200, 2nd Sunday of the month via Music R. Holland on or around 7364 kHz 1100 - 1300 and lastly every 4th Saturday via Delmare on 6207 1400 - 1700.

Radio Stella were back on the air on 18-3- using 7320 kHz between 1000 and 1300 with what was hopefully the start of a regular monthly schedule ! The station's 20 W transmitter was working well giving RSI one of their best signals to date and a listener called the station from France ! The current address is (now again): Mr. Jock Wilson, 17 Glendevon Road, Edinburgh, Scotland. Don't put RSI on the envelope !

The results of Weekend Music R Trans Atlantic tests have not been very encouraging with no American reports received but as consolation two reports from Italy were received for one of the early morning tests. The station has also received a correct report from Finland for one of their broadcasts over Xmas which the listener heard at 1620 ! Tests are currently being made around 15040 kHz (check 10 kHz either way) as yet with no response but watch out for them on Sunday mornings and afternoons ! WMR use the address 42 Arran Close, Cambridge, U.K. By the way, since the first WMR-test in January '81 reports have been received from... U.K., Ireland, Holland, Ecuador, Belgium, France, Denmark, Sweden, Norway, GDR, FRG, USA, Switzerland, Channel Isl.

WMR continued...

...Canada, Italy, and Finland.

A station called R.Gemma Int was noted on March 4 for the first time on 7325 kHz suffering from undermodulation. The DJ-lineup has been noted as Gordon Bennet, Bruce Wayne, Steve Marshall, and possibly Alan West and the listeners were led to believe that the programming was coming live from a field with lookouts posted! The address announced was RGI, c/o P.O.Box 319, Edenbridge, Kent TN8 6QE, U.K. The station could be located in Ireland!

R.Lynda Int were back on the air with a short broadcast on 18-3- using an announced 6233 kHz with 20 W of power. During this live programme no address was noted but a phone number was given. John Dean mentioned other Free Radio stations and even gave a mention to the Telecom! It is not known if further broadcasts will take place.

Spectrum World Broadcasting or SWBC are on 6272/73 kHz every Sunday and wrote that they are on between 0830 - 1105 with relays of the IRN (LBC news) at 0900, 1000, and 1100. They also might be on a daily service some time in the future 0830 - 0930. On 25-3- they announced a North American test on 13733 kHz 1600 - 1800 but nothing was noted in North Germany. Spectrum's transmitter is claimed to be of solid-state construction using V-FET's with an output of 15 W what will soon be changed to 50 W. Spectrum uses the address 134 Eastworth Road, Chertsey, Surrey KT16 8DT, U.K. They say that they are not using Krypton's transmitter (which they share very occasionally with that station!) so all info especially in the logsection of the last RADIOTELEX's is rubbish (so to say...).

Another new one, at least an identification of an UNID in RT 17, is R. Danby with the address Postbus 320, Hoogezand, Netherlands. They were on 6225 kHz on March 11.

R.Netherlands' Media Network reported that a new American backed offshore-project is planned for the North Sea. Broadcasts will be on 50 kW on mediumwave and on 10 kW on shortwave. The Radio Ship will arrive in the North Sea in July with official start planned for 1501 h on August 14. The station will be called Wonderful R.London Int WRLI from 0600 - 1900 and then relay VFG-Voice of the Free Gospel from 1900 to 0600, a religious operation.

R.Apollo Int closed down its transmission on 25-3- because reception in the U.K. was almost impossible due to the long skip zone. The signal was heard quite well on the continent but at 1045 the station closed with a rather depressed Dave Scott behind the microphone... Anyway, the rest of the transmission will be repeated on Sunday April 1st (what a date...) including APOLLODX and a thing called the Irish Interviews featuring Robbie Dale from R.Sunshine/Dublin. The transmission will start at 0830 and will be in the 48m band, most probably on 6240 kHz! Apollo decided to leave the 41m band for the next time due to the bad propagational conditions. Addresses for Apollo to write to are either P.O.Box 319, Edenbridge, ... or c/o RAI, P.O.Box 700 825, D 2820 Bremen 75, West Germany.

Any Dutch or English DJ who is interested to do half-hour shows for R.Pacific Int can contact them by sending demonstration cassettes to RPI, c/o B.P. 130, F-92504 Rueil-Malmaison CEDEX, France.

The last programme of R.Batida was better understood due to their new microphone. Batida also has produced a whole package of around 150 jingles (!) and also some sketches are planned for the following transmissions. The next listener's letters show "Hörerbox" will be transmitted on April 8 or 15, 1984. You can contact them at RB, c/o RT-address.

And that item rounds up RADIOTELEX no. 18. Please keep in touch with us and remember that we are always fighting for Free Radio!

73 and bye,

RADIOTELEX

Any material included in RADIOTELEX maybe used by other magazines or in DX-programmes provided RADIOTELEX is mentioned. Magazines doing not so have also been identified.

10-04-1984

Hi !

Two weeks have gone by and, Free Radio-wise, some new names have (surprisingly ?) turned up on the bands... perhaps due to April 1st ?

Only few people actually make use of our SAE-service which offers ~~mint~~ stamps of the U.K., Ireland, France, the Netherlands, and Germany. ~~Untill~~ April 30 (postmark) you can order FREE information and also ~~will~~ receive a FREE copy of RT 19 ! So, tell your friends who are interested in Free Radio to take their chance on that special deal ! Deadline for RADIOTELEX 20 is April 24. Remember to mail your items ~~some days~~ before that date !

News

R. Atlantis SW have left their mailing address at Ramsgate and they will use the RT-address for the planned transmission (and probably even after that ?). The broadcast will take place on April 29, 1984 and will also include a relay of R. Marabu Int (c/o RT-adr, use 'RMI' on the envelope, please !). Frequency will be 6200 or 6235 kHz.

Another programme of RMI will be transmitted on April 15, most probably via R. Waves Int on 7340 kHz. Talking of RWI, also R. Pacific Int will have 90 minute-shows soon via this station from France. Address for both RWI and RPI is c/o B.P. 130, F-92504 Rueil-Malmaison CEDEX, France.

R. Batida, Germany's all-Soul-and-Reggae operation, has changed transmission -times. Programmes will commence now at 1200 or 1215 GMT due to the current propagation-conditions. Possible frequencies remain between 7320 and 7364 kHz. c/o RT-address usin 'RB'.

R. Hotel Amigo plans to close down in the near future with a special transmission for all its friends. The operator has no time on Sundays anymore due to private connections (...). The 'last broadcast' will, most probably, take place on 41 metres.

Now let's switch over to All Fool's Day, April 1st and what it has brought to our ears...

At first, a mysterious R.Free Scandinavia was heard at 0920 on 6200 kHz at which time R.Madison appeared in most logbooks... may it due to weird reception-equipment down in Cornwall or to the others not listening properly... we just don't know ! Strange about this is a fully understood address of P.O.Box 160, N-6390 Vestnes, Norway and the fact that 7365 kHz with 10 Watts at a 1/2 wave dipole antenna was mentioned ! On 6200 kHz. Anyway, they plan to be on once every 3 or 4 months with a Disco formate.

On 6235 kHz, Week Eye R. (no address announced), another 1st April spoof project, was heard. They announced their return in June...

Also on 6235 kHz, a by-now suspicious audience noted the last sounds of Weekend Music R. from Scotland announcing their final broadcast ever. Whether this is hoax or not has to be seen later on...

R.Gloria Int (c/o RT-adr, 'RGI') from the UK originally was thought to be a one-off station but they now announced to be on once per month. 6255 kHz.

Misty Mountain R. on 6310 kHz worried those who hadn't turned off their radios yet. They gave an address of 33 Victoria Road, Salisbury, ... or was it 32...??...

The two 41m stations which now seem to have turned out to be a joke were on approximately 7330 kHz playing disco music and announcements of various (partly inactive) Free Radio stations (no address) and R.Free Universe on 7350 kHz, a test project of EST, Electronic Sound Transmission before their own programmes started. Note that EST have left their Box number although the address remains the same, 190 Monument Road, Birmingham B16 8UU, UK. R.Free Universe said that the transmission came from a place called Scott Basin...

R.Delmare was raided on Monday, April 2 when broadcasting on FM and MW. The PTT which confiscated the whole equipment as it seems said the raid took place because Delmare used to transmit on mediumwave which wasn't accepted by the authorities anymore. It is not certain what will happen to the station in the future.

/Brussels Calling (BRT), heard April 8, 1984

Brian Anthony, station manager of JFM writes that the relays currently being heard on 7710 kHz are completely unauthorised relays of the station's programmes. JFM has received a number of letters from several European countries. 2 Mitcham Road, London SW17, UK is the address

Confirmation of your reception report on our broadcast of.....

The latest Free Radio news!

R. Eastcoast Commercial appeared on Saturday, March 31 on the unusual frequency of 6280 kHz but was not received too well due to morse traffic and a weak signal. Here are two contact addresses for R.ECC: RECC (use initials only !), c/o P.O.Box 700 825, D 2820 Bremen 75, West-Germany or Commercial Services (do not use station's name !), P.O.Box 143, Woverhampton, West Midlands, UK.

The new offshore project including the stations Wonderful R. London International, WRLI, and R. Free Gospel which will start on August 14, 1984 (as reported) is backed by the Atlantic Charter Broadcasting Service with the address (for WRLI) 806 East Abram 'Suite 412', Arlington, Texas 76010, USA.

/Media Network (RN)

R. Laser has been said testing on 531 kHz, others say 558 kHz but everything about this station is unsure at the moment.

R. Apollo Int's transmission on April 1 was only on the power of 10 Watts because the car-battery had nearly run down. On April 8, they were heard on 7320 kHz unfortunately suffering from deep fading towards the end of the transmission. R. Apollo may be heard again on one occasion before May 6 when they will take a break for 3 weeks or so. The next extensive broadcast will be at the end of May, quite a long time to go... Please use P.O.Box 319, Edenbridge, Kent TN8 6QE, UK or c/o RT-adr 'RAI'.

R. Mirage Int was heard again on 6300 kHz on April 1st and is using a rather unusual address: c/o P.O.Box 2778, Elverhoy, N-9001 Tromsø, Norway.

The 32 Victoria Road, Salisbury, Wiltshire SP1 3NG, UK -address is now operating normally again. As a matter of this, BRI will turn to their normal schedule but R. Avalanche will no longer continue to use this address.

In RT 18 we reported about the planned parallel outlets of Sunshine R. in Ludlow, Shropshire. Here is the latest on that:

They plan to start tests in 2-3 weeks time but won't ID themselves as Sunshine until their court-case has taken place at the end of April. After that, they will relay their 1017 kHz mediumwave channel on SW 7325 kHz with 50 Watts and on FM 103.8 MHz. A second SW-transmitter is, as it was understood, also ready for service but if it will come into operation on a 49m in-band channel is still open.

R. Nova from Dublin returned on FM 103.4 MHz with a low-power transmitter, the 10 kW transmitter has been shipped back to the UK. Nova is planning to be sold to a local Dublin group of 4 businessmen for a fee of just £ 1(!!) by Chris Cary but obviously he will have the control over the station even after that.

Sunshine R., this time the one from Dublin, is jammed on its 100.5 MHz frequency by RTE which erected 2 new mediumwave transmitters at their Dublin site. It is supposed that these ones are jammers because the antenna masts are old telegraph-poles making the antenna to look very temporary.

Our last item reflects on R. 101 which plans to change to AM-modulation soon and hopes to be on every week when they can on 7450 kHz. Their address at the moment is: Postlagernd, D 4180 Goch 3, West Germany.

24-04-1984

Hello,

We had almost started a competition running under the headline: Which typewriter will be used in the next issue of RADIOTELEX ? but we then thought it over and now can definitely say that we will keep to this edition's printer...hi...!

Some of you will have noticed that there is some kind of 'late deadline', that is: Also news and logs which are one day late and arrive here in Bremen on Wednesday are also fitted in the manuscript of the current edition. Anyway, next deadline is May 8, 1984. Remember to post your contributions some days before, if possible. Only for the contributors from Germany it is more clever to send also the news of the weekend before the deadline !

Here we go along with the LOG-SECTION, time is GMT

NEWS

According to their latest info sheet, R. Brigitte from Belgium might test on 6550 kHz. However, no time or date has been given so far. R. Brigitte usually transmits on 6235, 6298, or 6306 kHz. Their address is: Brigitte van Gelder, Postbus 10, NL 7954 ZG Rouveen, The Netherlands.

Süd West R. Postfach 1471, D 6690 St. Wendel, West Germany, which tested on 6235 kHz March 11 has issued a new info-bulletin saying that their old transmitter plus various promotional material including QSL-cards and pennants have been destroyed by a fire recently. They are now going to broadcast on 6235 kHz with 20 Watts (and NOT with the 500 Watts they talked about a while ago...). New QSLs and pennants are available for 10 reception-reports in order soon. Their next broadcast will be on April 29 on 6235 kHz which they will stay on for the next months but the transmissions won't be regular anymore.

R-Eastcoast Commercial (R-ECC) will continue with regular transmissions every 1st Saturday of the month on 6280 kHz (and probably also every 3rd and 5th ?) due to, as they put it, the GPO borrowing their equipment and not returning it ! RECC's addresses remain as: RECC.c/o P.O.Box 700 825, D 2820 Bremen 75, West Germany or: Commercial Services, P.O.Box 143, Wolverhampton, West Midlands, UK.

Radio Delmare, the Belgian station recently raided (see RT 19) plans to continue and letters to support them in this effort are most welcome at Postbus 36, B 2050 Antwerp, Belgium.

Two corrections have been received (as far as RT 19 is concerned) : The religious station co-operating with the new offshore-project WRLI-Wonderful Radio London International- is called Voice of the Free Gospel (not that big difference, hi...). The correct address of WRLI reads: 806 East Abram 'Suite 412', Harlingen (not Arlington !), Texas 76010, USA.

Sunshine Radio from Ludlow was in our news section for two times now and here is the latest on this station: Every now and again, Sunshine has a visit from British Telecom. They come along and inspect the mediumwave transmitters, just writing INSPECTED on the side of the transmitter and going away. They told the operator that as long as they keep on frequency and don't do anything silly, they would do nothing against the station.

Apparently, TELECOM heard about their plans for SW (c/f RT 18+19) Shortwave was actually tested two nights last week: On Thursday, April 19 at 1900 on 7320 kHz just playing music and on another occasion (which we don't know...) !! Somebody heard it and told TELECOM about it. As a matter of this, TELECOM phoned the station manager and said if Sunshine would put SW on again, they will raid the station.

As Sunshine still plans to close when the new TELECOM-Bill comes into effect, they might put SW on again the last month of their life, according to the transmitting engineer Chris Evans.

The next R.48 transmission will be on May 27, 1984. Their address is: Postbus 19074, NL 3501 DB Utrecht, The Netherlands.

Premier R. from Ireland was heard quite often recently with good programming but with an undermodulated carrier on 6218 kHz. Their address is: 139 Ballyfermont Road, Dublin 10, Ireland.

/acc. to ASN 12

Misty Mountain R. (see RT 19) is a new Irish station, it seems that the April 1st broadcast was not a one-off. 32 Victoria Road, Salisbury, Wiltshire SP1 3NG, UK is their address.

/acc. to ASN 12

Free Radio Service Holland (FRSH) said during their April 15 transmission that they would be back the 3rd Sunday in May (20th) on 7325, 7320, 7323 kHz or on 48 metres. It is thought that, as far as Delmare has been raided, the transmission came via an own transmitter after being relayed for months by Delmare (amongst others...). You can contact FRSH at Postbus 41, NL 7700 AA Dedemsvaart, The Netherlands.

SPECTRUM WORLD BROADCASTING

134, EASTWORTH ROAD, CHERTSEY, SURREY, ENGLAND. KT16-8DT.

The next news-item comes from R.Apollo Int. R.Apollo's next transmission will take place the last Sunday in May and the first in June and will see a return of the ARN, the Apollo Relay Network featuring tapes from R.Sunday Int (c/o RT-address, use RSI), R.USA, and the Dutch R.Enterprise. One of the two transmissions will probably feature the by now extended Irish Interviews with Robbie Dale and then you will listen to hours and hours of tapes... Robbie Dale recently recorded brandnew Apollo jingles which you will have the pleasure to hear then. Apollo has two addresses available: c/o P.O.Box 700 825, D 2820 Bremen75 West Germany and P.O.Box 319, Edenbridge, Kent TN8 6QE, UK.

From R.Victoria's pressrelease issued on April 18, we take the correct address of R.Europa Internazionale transmitting on 9428-9 kHz: Via Privata Terzulli 10, I 25100 Brescia, Italy.

As from Easter Sunday (April 22, has just passed...) Weekend Music R. will be on once per month for 90 minutes, ± 0830 - 1000 GMT with R.Stella following this for 3 hours, i.e. 0830 - 1300 !! Frequency will be 7380 kHz again but '7340'-jingles may also be used. WMR's address still is: 42 Arran Close, Cambridge, UK.

We have been asked to print this advertisement. As it is quite long and in German, we haven't got the time to translate it:

>Jeden Monat erscheint das CLCG-Magazin in deutscher Sprache. Probeheft kostet in Deutschland DM 2 als Geldstück oder in kleinen Briefmarkenwerten. In Europe, 2 IRC or DM 2.30 in German money or German stamps are requested. R.CLCG sucht einige Relaystationen, die Samstagsnachts oder Sonntag Programme von mindestens 60 Minuten Dauer ausstrahlen können.

Bitte deutlich schreiben an: CLCG, c/o Wilfried Meyer, P.O.Box/Postfach 540 101, D 4100 Duisburg 11, West Germany

R.Black City returned on April 22 with a test transmission on 7322-3 kHz with announcements in German and English playing rockmusic but suffering from undermodulation. The announcements were German-accented and no address was heard.

Spectrum World Broadcasting announced during their Easter Sunday (April 22) transmission that this was one of their last transmissions on 6272 kHz. As reason for this they mentioned the bad propagation situation on that frequency (I can't understand why, really. I'd put it to severe CW-interference more likely...ed) and announced in their own special way of saying such things that SWBC will move 'some 100 kHz away'... This information was noted at 0845 GMT on the day stated before. They also announced parallel outlets on 7710 kHz and 13733 kHz, the latter cannot be confirmed as I didn't hear it myself... For address see the bottom of page 3.

Here is another important news-clip from ASN 12 (Thank you, Stuart !): Station 41 plan to be back for some more broadcasts between June 15 and September 30. Nothing more is known at the moment but perhaps Stuart will let me know soon ?

Well, that exhausts information this time, probably it is because of the slow postservice after Easter... don't know. If you have any, and I MEAN A N Y bit of information please pass it on straight away to our mailing address at Bremen. We'd certainly love to hear from you.

Note that any item used in RADIOTELEX is free for any other FREE RADIO-magazine or DX-programme provided RADIOTELEX is mentioned. We always try to mention our sources as far as we are allowed to, hi !

08-05-1984

Hi.....<Put in your name, please !

RADIOTELEX No. 20 had to face an enormous sold-out (50 copies in 12 days), something which we obviously DO like !

Also, some more people showed interest in our SAE-service offer, so we are quite optimistic, RADIOTELEX-future-wise...

Our next deadline is May 27, 1984, a Tuesday as usual.

To start with, here are the LOGS, time is in GMT :

NEWS-SECTION IN RADIOTELEX

This is the current schedule for R. CLCG : 2nd Sunday of the month via Music R. Holland on $\pm$ 7365 kHz from 1100 - 1400 GMT with Dutch, German, and English programmes. The DJ's are: D+E, Steve Young (CLCG International), G. Stephan Kaiser (Hallo Europa), and, G. Frank (Disco Aktuell). Each show will last 60 minutes. Also, R. CLCG can be heard on mediumwave via Woodpecker R. between 2300 and 0100 GMT every second Sunday of the month on either 1638, 1625, or 1610 kHz with the German show "Hallo Europa" and Steve Young's show in English and Dutch. QSL-letter and schedule are available for IRC or SAE. Attention: The mediumwave transmissions will be put out in parallel to shortwave from May 20, 1984 ! CLCG's address is: c/o Wilfried Meyer, P.O. Box 540 101, D 4100 Duisburg 11, West Germany.

News of Sunshine R./Ludlow. They appeared in court on April 26 and were fined £ 500. This time 'Barrie' was charged after accepting ownership of the transmitter, each time it is someone different so that it's always a 1st offence. The station were off the air for one afternoon only and returned apologising for their 'technical break'. The court ordered confiscation of all equipment although it is not known if this has taken place yet. Sunshine continue as normal although the signal is down indicating that the 500 W transmitter is not in use. One guess is that either this has been taken and they are using the 227 W standby transmitter, or they have removed and hidden the 500 W rig themselves until after the authorities' visit so that they will confiscate the lower-powered transmitter.

In Ireland, jamming on 531 kHz has started of Sunshine R. by RTE, although this is not constant. The jamming is reported to have blocked out RTE themselves on 567 kHz and also local emergency services, so it is thought that it will not continue. Sunshine are appealing to their listeners to complain to their local TD's (members of parliament).

R.Nova are being heard on 729 in addition to 819 kHz, this is not an unauthorised relay such as Nova Southside as Nova themselves announcing 729. This is right on top of RTE Cork also using this channel and even in the West Midlands Nova is wiping RTE out!. It is thought that the 2nd channel is because RTE will not be able to jam two channels at the same time, and they won't put a jammer on the same frequency as used by their Cork station on 729 kHz.

R.Apollo Int is about to open an FM outlet to be known as PCS-FM this summer, on probably around 103 MHz. The shortwave service will continue as usual with full power (30 W) resumed from next broadcast. Apollo can be contacted via 2 addresses: RAI, c/o RT-adr or via P.O.Box 319, Edenbridge, Kent TN8 6QE, England.

UKGM is expected to return to shortwave soon as the OP has returned from R.Nova/Italy. UKGM has the old Apollo-2 tx (20 W).

RADIO

MARABU

To: _____

Date: 15.04.84

Freq.: 7339 kHz

Time: 09.19 GMT

SINFO: ----

via Radio Waves Inter'l

ADDRESS: R.M.I. -P.O.Box 700825
D 2820 Bremen 75

R.101, Postlagernd, D 4180 Goch 3, West Germany informed the short-wave audience that the next broadcast will take place in AM not in FM ! As a matter of this, the equipment has to be re-build and forces the station to stop transmissions until around June 10 which is a holiday in Germany. R.101 got 20 reports for their April 1st broadcast, the DJ is Johnny Best.

News on R. Batida: The next programme will most probably include a DX-show compiled from the latest editions of LS (LAUTSPRECHER) and RT (...which of course is good advertisement !-ed). The transmission will start again at around 1200 - 1215 GMT but the date cannot be given yet, as usual, due to reasons of security. RB c/o RT-adr.

Here are some remarks to recent RT-issues:

1. IBC has in fact been heard via R. Time on April 1st, 8th, and 15th. The programmes were in parallel (//) to vll583 kHz with programmes of R-Time heard before and afterwards (probably via an IBC-transmitter ?).
2. R-Brigitte from Belgium has already made the announced test(s) on 6550 kHz on March 18 (has been received for more than 4 hours then). Even on February 12, an UNID station had been noted on that frequency. Possibly Brigitte, too ?? Their address again: Brigitte van Gelder, Postbus 10, NL 7954 ZG Rouveen, The Netherlands.

And now to a German operation. R. Silvia Int will probably make a test transmission via an own (!) transmitter on May 13 on 6225 kHz between 1000 and 1200 GMT. Their address is: c/o P.O.Box 600 431, D 2000 Hamburg 60, West Germany.

R. Caroline SW has returned on April 29 with an "Okey Dokey"-test b y Freddie Archer! Here is their slightly changed address: c/o P.O.Box 3, Brandon, Suffolk, England.

A letter sent to Mi Amigo R. Int (address: North Street, Swords, Co-Dublin, Ireland) has been returned to sender marked "Gone Away". Despite this, the station still announced this address on April 22. Has anybody any idea ? Anoraks Ireland, perhaps ?

Spectrum World Broadcasting announced to be on May 7 on 9960 kHz with a power of 500 W. Whether this is true or not, we will hopefully read about in the next RADIOTELEX. The address for the station ("Our programmes are different. They are different but they are good !") ("Jay Jackson!!") is the same as for R.Krypton: c/o 134 Eastworth Road, Chertsey, Surrey KT16 8DT, England.

To come to the end, here is an advertisement :

ANDRAKS IRELAND which will expand its newsletter from the current two A4 pages on June 1st informs you on the adventurous events going on in the Irish Republic. Also, beginning from next month, they will have an extra sheet with UK Free Radio and related items, plus magazine recommendations for FR-DXers... Return postage is needed and important: A SAE from within Ireland, 2 IRC's from the UK and the continental Europe excluding the US. Their address is beneath: c/o 310 Collins Avenue West, Whitehall, Dublin 9, Ireland.

73's and F.F.F.R. RADIOTELEX.

Information included in RT is free to other bulletins and Free Radio DX-programmes provided RADIOTELEX is credited.

22-05-1984

Hello to you all !

What do YOU think when you are listening to a Sunday (or Saturday) Free Radio station ?

No, this should not turn out to be one of the "Who-is-the-best-on-shortwave ?" polls but is just a simple question. The answers to that will be printed in one of the next RADIOTELEX's depending on how many reactions we receive.

Right. Deadline for RT 23 is Tuesday, June 5, 1984.

UPDATER

On May 6, UK R.Int has been heard on 6235 kHz at 0921 with poor signal in the West Midlands.

Also, 7320 kHz an UNID station has been noted at 1159 the same day. Any info ?

One day later, on May 7, a station turned up on 6280 kHz calling itself MRBC with sign off at 1125 and announcement mentioning that he would be back in a half hour, and indeed he was at 1155 - 1215 saying it was a live broadcast and apologising for the rough modulation. When signing off, he said that he might be on again later that day or even on May 8 in the afternoon ! Listeners should not use his old mailing address, the DJ called himself Hugh Welsh when he formerly used 6850 kHz with 10 Watts. It seems that 6280 kHz is getting popular !

NEWSSECTION

The Satellite Broadcasting Company, SRC, plans a special surprise for all its listeners some time during the summer months. This will be their last transmission due to various problems. A relay station for that broadcast has not yet been found.

KBC-Radio has dropped the address of Postbus 725, Arnhem recently and can only be contacted now via Postbus 23, 6744 ZG Edeveen, Holland. Anyone who would like to contribute to the KBC-newsletter (next issue should expire in August) please write to the above address. KBC plans to set up a FM-station in the near future operating with 100 Watts of power.

Radio Delmare is going to test shortly with 150 Watts on old 6206 kHz. A new station plans to operate soon using R.Delmare's transmitter and the name of Parrot Radio. Parrot Radio sent an info sheet directly to the RADIOTELEX-address and the strange thing about it is that this letter was postmarked 'BREMEN' ! I really wonder who is the one behind Parrot as I do not know anybody who might be... Anyway, they are about to open programming on June 10 at 1030 GMT but, logically, only when Delmare will be back then. Parrot's address is: Postbus 41, 7700 AA Dedemsvaart, Holland.

R.Dandy, a new Dutch station, announced to transmit once a month

R.Dandy continued...

on 6225 kHz. So far, they have tested on March 1 and 11 on that frequency for which they received 11 reception reports. R.Dandy uses a X-tal controlled valve transmitter together with a 40 metre long aerial, 17 metres above the ground. QSL-cards are ready soon and should then be available from Postbus 320, 9600 AH Hoogerzand, Holland.

R.48 will be on again on May 27 on the 48 m band (ref. RT 20) including a mailbag programme presented by Dave Scott of R.Apollo. The 300 Watts transmitter (ref. RT 10) won't be ready before July 1984. Until then they will continue with their 20 Watts transmitter. 48's address is as follows: Postbus 19074, 3501 DB Utrecht, Holland.

Britain Radio International. BRI, has suspended broadcasts recently after a report about BRI had appeared in a local newspaper in April 1984. Anyway, they hope to be back June 24 on 6225 including the German service presented by Johnny Best starting at 0830 GMT.

Radio 101 with the address Postlagernd, 4180 Goch 3, West Germany has ceased transmissions on FM 101.0 MHz on May 6 after the German Bundespost (GPD) had complained that the station was causing interference to German radio WDR Bonn on 100.9 MHz with 5 kW of power. The station is now trying to get a license to operate totally legal from Belgium; if these efforts fail the station will close for good on FM in this area.

Meanwhile, the shortwave broadcasts on 7450 kHz will continue: the next transmission is scheduled for Whitsun-tide (Pfingsten) 1984 which is the weekend of the 9-11th of June (ref. RT 21). The station uses an additional new address to the 'Goch'-address: Postfach 2, B 4680 Gemmenich, Belgium.

PLUTO

QSL

...who heard a live
broadcast from...

RADIO PLUTO WESSEX

OFFSHORE

WRLI - Wonderful Radio London International

It has been suggested that this station may after all be a joke and that the cheque used to pay the transmitters was false and has not been accepted by the bank.

Radio Laser seems to have returned testing, first noted on May 7 on 558 kHz with oldies and Top 40- music without any announcements so far. Signal strength and modulation seems to be O.K. though the signal appears to be only half as strong as Caroline's. In fact, it is said that one of the two 25 kW transmitters is broken and that Laser is on a maximum of 15 kW power. Reports sent to the station's address at Madison Avenue have been returned so why not try this new one: Box 1828, Grand Central Station, New York, N.Y. 10163, USA.

Westside R. International announced that R. Valleri will re-appear the coming weeks on 6260 kHz.

R. Xanadu now has the intention to come on 6300 kHz every Sunday between 0900 and 1000 GMT. DJ Johnny Drake promised QSLs via their address at 42 Northcote Road, West Croydon, Surrey, England.

R. Manila c/o Francesco Sacco, Via Leini 40/f, I-10155 Torino, Italy is on the air with 100 Watts in LSB on 7214 kHz (c/f logs !) and likes to hear from you !

And that rounds up RT 22. Not too much, I'm afraid, also the reason for at least 2 (!) QSL-cards being reproduced, but we had not more into available. A feature on R. Sylvia Int is possible for the next issue if we get information from them. 73 + FFFR. R A D I O T E L E X

05-06-1984

Hello, nice people !

Unfortunately, the 'information-gap' still holds on and I sincerely hope to be able to print only one sticker or something else to fill empty space in this edition. The reason for this is that contributions from the regular reporters haven't been too numerous the last time.

Deadline for RADIOTELEX 24 is June 19, 1984.

The Loggings with times in GMT !

R.Sylvia 6225 kHz 14-37 days return-Postd9e sent,2 stickers,
info-sheet and letter received

NEWS

Sunrise Radio was heard on June 3 with a nice Funk-show on 11416 kHz. DJ Steve Jones informed the audience that there will be no transmission in July due to the staff taking their holiday. Sunrise's next programme shall be on August 5 - every 1st Sunday of the month as usual. Address is: c/o Postbus 41, 7700 AA Dedemsvaart, Holland.

R.Apollo Int received around 25 letters for their March 25-broadcast. Quite surprising, because this was one of the 'demoralizing' transmissions due to the bad propagational situation which had the effect that the signal wasn't heard in the UK but on the continent from where most letters arrived, e.g. from Italy and Switzerland !!

After a trip to 48 metres recently, Dave Scott, the station's manager tested 41 metres again on June 3 first using 7330 kHz and then QSY-ing to 7320 kHz after he had realized causing interference to R.Enoch. The transmission consisted of music and a guest DJ-show from Mr. Blue-sky of R.USA. Next weekend, June 10, there will be a 'regular' Apollo-Sunday with the DX-programme APOLLIDX (worth to listen to !) on a 41m band channel and with, hopefully, full power. Therefore, Dave has to buy a new car - battery costing £ 12.

Well, anybody who has that much money left should know by now where to spend it, hi...! RAI has to contact-addresses available:
c/o P.O.Box 319, Edenbridge, Kent TN8 6QE, England or,
more convenient for continent listeners, c/o Postfach 700 825,
D 2820 Bremen 75, West Germany.

R.Titanic Int claims to have a special 9th birthday show lasting approximately 1 hour in the 26m band on $\pm$ 11400 kHz in the near future. Transmission time will be $\pm$ 1000 GMT and the station might either be heard in parallel on $\pm$ 7350 kHz on 41 metres or on another occasion with a repetition of that show on the 41 m band, the same day or on another date. Their address is also the Dedemsvaart-one.

R.Xanadu, 42 Northcote Road, West Croydon, Surrey, England, will soon have their last transmission ever because the act of tracking down a pirate radiostation will be taken over by the Department of Trade and Industry on July 1st which is expected to react much quicker than the Home Office did.

R.Batida, c/o RT-adr, will start transmissions again at 1000 GMT or, depending on the propagation conditions, at 1200 GMT. Dates are not fixed as ever but the programme schedule is extended now to 90 minutes. Batida usually operates in the 41m band between 7325 and 7370 kHz.

R.Laser is on 558 kHz mediumwave with full programming since May 24. The signal in the UK is very strong and therefore it is thought that Laser 558 is on a power of nearly 50 kW now. They recently had problems with their anchor-chain and drifted 4 miles off their position 1 1/2 mile from the Ross Revenge but soon found back using the ultra-modern satellite-navigations-system on board. Transmission hours are between 0400 and 2400 GMT and the address is: Box 1828, Grand Central Station, New York, N.Y. 101 63, USA.

923

R.Caroline, also from the North Sea, was off the air for 3 days the week before last because they have had a run out of fuel which is supplied from Spain but hasn't been paid for 3 months ! Anyway, the people behind Caroline managed to get a tender from England to the radio ship providing it with fuel for only 2 weeks ! So Caroline's future is a bit uncertain at the moment. Tests on 974 kHz have been heard after 962 kHz had gone off suddenly but with a strongly distorted signal which at least forced them to switch to their 5 kW standby transmitter. The reason for the distortion on 974 kHz is, possibly, that the modulator's output stage for the big transmitter is seriously damaged and that it will take some time to repair it.

ANDRAKS IRELAND is a newsletter which informs you on the Irish Free Radio scene and on events going on in the UK FR-scene. Just send return postage: A SAE from within Ireland, 2 IRC from the UK and the continental Europe. The newsletter is 3 or 4 A4 pages each time and worth reading. Contact: 310 Collins Avenue West, Whitehall, Dublin 9, Republic of Ireland.

News on R.Marabu Int. The next relay programme will be transmitted on June 10 or 11 (note that the 11th is a Monday and a holiday in Germany. If it is also one in the UK, I don't know.) Relaystation is R.101 and therefore frequency will be 7450 kHz. Marabu's programme will last 90 minutes and consists of a David Bowie-special and a Funk-music programme. No exact starting time has been given for the programme but I recommend to tune in to 7450 kHz as early as possible because R.101 themselves announced to be on the 10th of June (c/f RT 22). Marabu's address is RMI, c/o RT-adr and 101's is Postlagernd, D 4180 Goch 3, West Germany or Postfach 2, B 4680 Gemmenich, Belgium.

R.Waves Int from France almost every Sunday transmits a German service with DJ Andi Top depending on the tapes arriving in France in time. Time is 1115 to 1145 GMT on 6275 or 7340 kHz. The DJ is 15 years young and likes to hear from the listeners. The listener's letters are also read out on the show so why not send one to RWI, Andi Top, B.P. 130, F 92504 Rueil-Malmaison CEDEX, France ?

The current schedule of RWI is as follows:

0850 Introduction and programme-preview for the day.

0900 R-Pacific Int - relayprogramme

0945 R.Waves Int

1030 R-Pacific Int (Part 2) or R.Marabu Int

1115 German Service with Andi Top (may be substituted by RWI in English)

1145 RWI

1200 R.CLOG - relay programme on all Sundays except each 3rd and 5th

1245 close down

Every 4th Sunday of the month, Andi Top produces a show for R.CLOG featuring Free Radio News (Hmmm !!!---!!!), touring dates, etc..

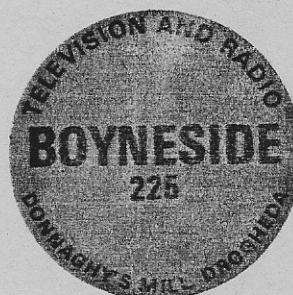

Andi Top special continues on page 4 !

Also, Andi Top is heard on the German service of Music Radio Holland, MRH. Together with Bob he presents a show with oldies and also contemporary - music. This programme is heard every 2nd Sunday of the month on 7365 kHz between 0900 and 0930 GMT. Address for suggestions and criticism is MRH-Andi Top and Bob, Beumeesweg 151, NL 9661 Alteveer, Holland. When R Delmare is back on the air, R-CLCG will also have its transmissions via this station resumed. Andi Top (!!) will then be heard every 2nd Saturday of the month between 1300 and 1500 GMT on 6206 kHz with the German service. Address: CLCG, Andi Top, Postfach 540 101, D 4100 Duisburg 11, West Germany. R-CLCG also wrote that their mediumwave programmes every 2nd Sunday of the month via Woodpecker Radio (1638, 1625, or 1610 kHz) between 2300 and 0100 will be abandoned if the reply for these transmissions is not sufficient.

The last news item today comes from R. Sylvia, a German station. They informed us that they also will have a transmission on June 10, 1984 on 6225 kHz with an output power of 20 Watts and a hopefully better antenna than on May 13. That broadcast shall take place from 1000 to 1200 GMT. They also wrote that they were on 6225 KHz from 1006 GMT onwards and not that early as reported in RT 22's log-section (0931 GMT). So another station must have used this channel before Sylvia came on playing music from Hot Chocolate and the Nick Straker Band. Has anybody any idea? Sylvia's schedule is every 2nd Sunday of the month at the time stated above but with more likely 50 Watts (as their info sheet tells.). Finally, Sylvia's address is: Radioklub Sylvia, P.O.Box 600 431, D 2000 Hamburg 60, West Germany.

19-06-1984

Hi !

RADIOTELEX NO. 25 will be out on July 3, 1984 which is the date by which your letters must have arrived here in Bremen. That's just to remind you because not many people wrote in with news and loggings it is just the 'same old song'...

So, please remember the deadline !

A MESSAGE TO ALL SUBSCRIBERS

The next months, the first annual subscriptions will expire. To make sure that you have paid also for future copies of RADIOTELEX, please look on the address label on the envelope in which you received this RADIOTELEX. There, you will find two numbers, e.g. "1-26".

This means that you have to pay again from No. 27 onwards. If you like to renew your annual subscription, please post the sum of money indicated on top of this page for your country exclusively (DO NOT SEND THE EQUIVALENT OF DM 25 !!) by registered mail in time to make sure you won't miss an issue. Thank you !

NEWS

R.Mirage planned to go out on shortwave again about two weeks ago but, unfortunately, this plan failed because the transmitter which is stored beside the operator's bed was badly damaged (loss of a 807 valve) due to a book that had been dropped !
Anyway, Mirage wants to continue when the spare valve has arrived.
Their address is : Postboks 2778, Elverhøy, N 9001 Tromsø, Norway.

ABC Tramore, an Irish local station, put on an old shortwave transmitter on June 17 to activate the shortwave 41m band a bit ! The staff, consisting of ex-British landbased pirates, themselves are listening to Sunday morning Free Radio and they always become bored when there is not much activity on the bands. First, the signals on 7325 kHz were believed to have erupted from R.Apollo Int's transmitter but this has been denied and explained.
However, if ABC is on again (we don't know) here is their address:
c/o The Carpet Warehouse, Tramore, Co. Waterford, Ireland.

E.48 with the address Postbus 19074, NL 3501 DB Utrecht, The Netherlands tested from a car recently using a whip-antenna and in fact managed it to get the SWR down to 1:1 after a long time of experiments on 48 metres. They also tested on 7380 kHz on June 17 but nothing has been heard, mainly, because such an antenna is not very effective. On the other hand are we excited to hear more about these tests.

The next item is R.Waves Int from France. From April 23 to May 12 R.W.I.'s transmitter was only on the power of 5-8 Watts due to some trouble in the modulator-stage. They are now preparing a new power supply for the transmitter, too, so that it will be possible to operate directly from the mains to increase transmission times.

R.Waves Int continues...

RWI now also relays R.KIWI from New Zealand once a month and also R.CLCG twice a month. After 6 months on the air, DJ Peter Hills wants to thank all those who have written in so far. Their address is: B.P.130.F 92504 Rueil-Malmaison CEDEX, France.

R.Apollo Int wasn't on the air the last two weeks as announced because the transmitter had broken down and it took some time to get it repaired. Now, the next show shall be on June 24 on 7330 kHz and with, hopefully, full power. Dave Scott now also has his studio improved and is actually making use of an equalizer which should result in an excellent audio quality. Apollo's two addresses are:
1) c/o P.O.Box 319, Edenbridge, Kent TN8 6QE, England or
2) c/o Postfach 700 825, D 2820 Bremen 75, West Germany.

R.Xanadu said that they will be on for their final broadcast on July 1st, 1984 from 0900 GMT with a History of R.Xanadu. If you like to write to them for the last time: 42 Northcote Road, West Croydon, Surrey, England is their address.

We made a mistake in No.23 regarding the address of R.Laser 558. Their correct one is: Box 1892, Grand Central Station, New York, N.Y. 101 63, USA. They were on 558 kHz recently but had some breaks during their broadcast hours on the weekend of June 16/17.

Here follow some advertisements :

A UK DXer wrote in and asked RADIOTELEX if we could publicise his offer of the following tapes:

The following programmes of R.Laser 558. Only these five tapes are available, no copies are made !

Date

27-05-1984 Dave Lee Stone, Paul Dean Shows on TDK Cassette (90 min).
Tape begins at 1153 am British local time.

28-05-1984 Dave Lee Stone and Paul Dean on TDK 120 min. cassette.
Tape begins at 1114 am.

The following are all 60 minute TDK cassettes:

29-05-1984 Paul Dean show (begins at 0110 pm)

29-05-1984 David Lee Stone show on SONY cassette

01-06-1984 David Lee Stone show, A side begins at 1010 pm, B side at 1105 am.

The price is £ 3 Sterling an hour and payment must be made either by British Postal Order, International Money Order (for those living outside the UK) or cash in a registered envelope. No other forms of payment are accepted and all payment must be made in advance. Delivery to a country outside Europe will be by surface mail.

PLEASE: Before you send any money in any form to the RADIOTELEX address, contact the DX-er via our address first mentioning "TAPE OFFER" on the envelope. We will pass on every letter.

Here are 3 stickers advertising 3 FR magazines:

03-07-1984

Hi !

It seems that the letter printed in RADIOTELEX No. 24 has motivated also other DX-ers to write their opinion on the matter "What do you think when listening to Free Radio ?"

Well, what do YOU think ?

Deadline for RT No. 26 is July 17, 1984.

L O G S time is in GMT !

County Radio, 7350 kHz.

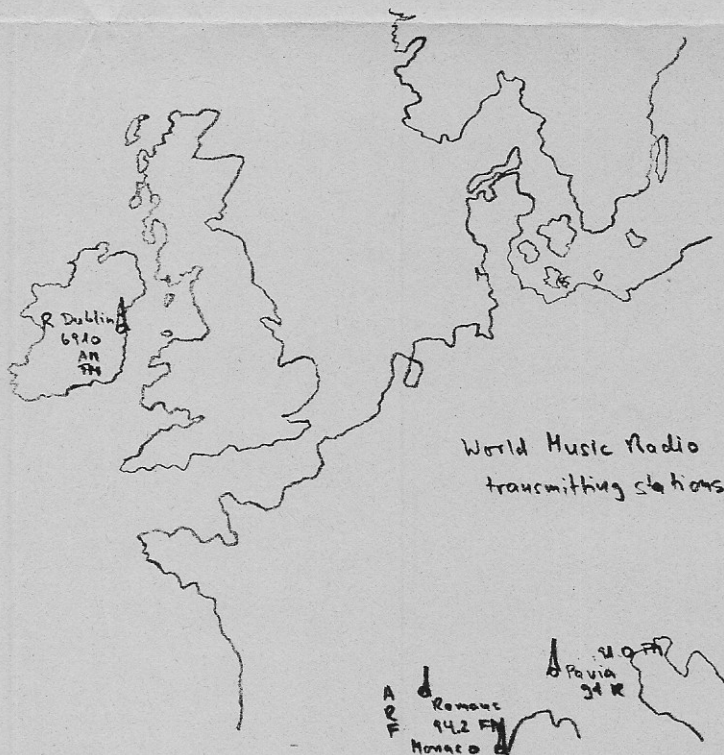

NEWS

According to their latest info-sheet, World Music Radio (P.O.Box 4078, NL 1009 AB Amsterdam, Holland) has merged with Ninety-One Radio in Pavia and can be heard now in that area 24 hours a day on 91 MHz FM in stereo. A SW outlet on 9845 kHz is also planned for the near future. WMR is to be heard in Monaco and parts of France via the Agence France Radio (AFR)-network including R.Riviera, Monaco and Radio Dauphiné Vivarais, Romans, both on 94.2 MHz FM stereo. Via Radio Dublin, WMR is transmitting on Sundays 0445-0900 with a repetition the following Monday 0100-0515 on 6910 kHz plus AM and stereo FM in the area of Dublin.

R.Kristel Int., 58 Aldersbrook Road, London E12 5DY, England, told in a letter that QSL's aren't available at the moment. New cards are printed soon and should be ready before their next transmission (August 29, I suppose, as RKI is broadcasting only on Bank Holidays). Frequency is 6230 kHz.

Some confusion has arisen concerning the addresses of Radio Laser 558: Music Media, 341 Madison Avenue, New York, NY 10017, USA is the right one if you would like to order either a station's poster (£ 4.00), T-shirt (£ 6.00), or 15-minute-video clip (only VHS and BETAMAX possible) for £ 15.00:

P.O.Box 1892, Grand Central Station, New York, NY 10163, USA is the actual mailing address for all correspondence to the station's staff on board the MV Communicator:

P.O.Box 1828, Grand Central Station, New York, NY 10163, USA appeared in a US-newspaper advertisement to get new DJs for the station to replace the sea-sick ones.

R.Mirage (c/f RT No. 24) went on the air on June 24 using 7320 kHz when they signed on at 0800. After the operator noticed that he caused interference with/to R-Apollo Int on the same frequency he changed to 7350 kHz. Mirage also tested on July 1st, again on 7320 kHz and later QSY-ed to 6230 kHz because long-skip conditions resulted in negative reports from the UK. Their address again: Postboks 2778, Elverhøy, N 9001 Tromsø, Norway.

It has been suggested that R.Batida from Germany should better broadcast in English for the next time because long-skip gave the station excellent signal-reports in the UK !! Batida is on the air irregularly on 41 metres with mainly funk, soul, reggae and all that good stuff. Contact via RT-address.

R.Apollo Int is a regular item in RADIOTELEX which shows that it is quite an active station. They should have relayed R.Sunday Int on June 24 but it was impossible for the second time now (!) because of the tape having a recorded mixture of the intended programme and a radio show which was recorded by accident on it: possibly, the work was done on a radio/cassette recorder....

The addresses for the two:

RAI, c/o P.O.Box 319, Edenbridge, Kent TN8 6QE, England or via RT-adr and

R.Sunday Int via RSI, c/o RT-address, too.

Crystal Radio made a test broadcast on June 24 on 7375 kHz with a West Yorkshire - accented announcer behind the microphone. They hope to be on every other Sunday. Address is: c/o 27 West Street, South Elmsall, Pontefract, West Yorkshire, England.

Another new operation is the supposedly German operation Radio Big Brother. They also tested on June 24 on 41 metres, 7330 kHz. The station announced to come on with regular broadcasts in late Summer 1984 with programmes aimed for West German listeners from 1100 hours local time for 1 hour. At the moment, 1100 local Summer-time in Germany is 0900 GMT. No address was announced yet.

R.Earth now also transmits via R-Milano International on 7295 kHz. R.Earth is an American station usually heard via WRNO on 6185 kHz between 0400 and 0500 GMT. Their address is, although not complete, c/o 7274Avenue, Evanston, Illinois 60201, USA.

Here is some late info on R.Marabu Int's programmes being broadcast via Radio 101 on June 10 and 11. On June 10, FModulation was used, and one day later, AModulation was introduced. More programmes will be heard soon via R.Atlantis SW. RMI's as well as RASW's address is c/o P.O.Box 700 825, D 2820 Bremen 75, West Germany.

At the same place as in RADIOTELEX No. 24, here is again an interesting letter from another German contributor. More are wanted and will be re-printed in full length.

For myself, there are several reasons to get up at an impossible time on a Sunday morning and listening to the radio. Well, I would call myself a QSL-hunter for some reason because in case of 90 % of the pirates I am only interested in the QSL-card. Apart from a QSL, many pirates offer nothing else. There is a 15-year-old pupil who buys himself a LP and a cassette recorder and believes in being the DJ No.1, stuttering an identification onto the tape thinking he is the King of Free Radio. He hasn't got an own transmitter so he is sending his cassette to a person owning such facilities and this guy in fact is so silly to broadcast the tape. That is not Free Radio, is it amateurism ?--

On the other hand, there are few pirates who are able to present a well-chosen programme with a good DJ that is pleasantly different from legal radio (e.g. Apollo, Batida, Krypton, etc...).

Also, there is the technical side. With some kilowatts everyone can export his rubbish via Italy to the rest of the European Community without running any risk.

I show respect for those who are also going out to the forest with a car-battery and self-built transmitter even when it is cold outside and raining. Perhaps Free Radio is nothing else but the last adventure in our computer-controlled age.

Without any risk, life is boring.

Also because of that, I am listening to Free Radio.

#####

A contributor suggested to print also features on Free Radio in other parts of the world, about stations in Indonesia, for instance. Hints dealing with 48 and 41 m reception antennas also would be appreciated, in other words: the readers want more technical information. OK, I will think it over when I am in France, hi

And that ends up RADIOTELEX No. 25. News, logs, and comments always are appreciated. Remember to mail your letters some days before the deadline printed on page 1.

73 and Fight For Free Radio,

17-07-1984

Hi !

Just two days before RADIOTELEX is off to the holidays, RT No.26 is compiled. It is the usual mixture of logs and some news which reached us the last two weeks. A quick word on membership-renewals: The numbers indicated on the envelope in which you received this RT show for which issues you have paid, for INSTANCE "4-29" means that you have received/will receive RT No.'s 4 to 29 . If you like to renew your subscription you have to send the amount of money indicated for your country on top of this page to our address after No.29 (in this case) has been issued at the latest !.

RADIOTELEX No.27 will be out around August 1, 1984. Please write in !

NEWS

R.Na Gael is the name of the UNID Irish station heard on July 1, 1984 (c/f RT 25) on 6340 kHz. This is said to be a parallel outlet to AM 1315 kHz and VHF-FM with 40-50 Watts of power. R.Na Gael's address is: c/o Mount Torry, Swords, Co. Dublin, Eire.

R.Eastcoast Commercial had to close down suddenly due to close encounter with Home Office/Department of Trade tracking personnel. The future of the station again is in serious danger now and they may be forced to close for good. Contact is still possible via RT-address.

Here is the contact-address for R. Earth Int that can be heard via R. Milano Int on 7295 kHz on Sunday mornings:
c/o 1724 Sherman Avenue, Evanston, Illinois 60201, USA.

R.Waves Int is now broadcasting its German service between 1115 and 1200 GMT on 7340 kHz. A mailbag show can be heard at around 1150 GMT. Letters are always welcome, the address is: RWI, Andi Top, BP 130, F 92504 Rueil-Malmaison CEDEX, France. RWI also issues an info sheet that is free of charge in English and German.

Music R.Holland will take a summer break that might last until October 1984, so no programmes will be heard from MRH until October. In a letter they told a DJ that they recently had problems...

Now, here is another response to our question "WHAT DO YOU THINK WHEN LISTENING TO A FREE RADIO STATION" :

When I hear a Free Radio station I feel very happy because I like the programmes of these stations more than those from major international broadcasters. FR operators risk much more and these OPs like

to be on the air with good programmes although they haven't a large budget, but their programmes are better because they do much more for the listeners. Free Radio stations have a mailbag show, they answer each letter, they inform you what is going on behind the scene.

After all, what is Free Radio good for? I think stations like R.Batida R.Victoria, or Sunrise Radio can fill the gap of music-programmes because each of these stations play music which cannot be heard on the official ones. So I think that Free Radio stations are an alternative. It is a way of reaching many listeners although reception quality isn't so good as on VHF.

At least I would like to say something to the letter in RT No.25. I think it isn't so important what the DJ's name is. Nearly every FR-DJ has a DJ name and if his name is a little bit silly then it is only because this name can be better remembered by the listeners and I think that the DJ you are writing about doesn't think that he is the best one. In his programmes he says that he isn't very good and he knows this but he wants to improve his presentation and listeners should tell him what they like or don't like.

I think that a DJ should be friendly and should play the music his listeners like to hear. And when he stutters a bit sometimes then he probably is nervous and the longer he will present programmes the less he will stutter.

That far with the letter from Austria. Of course, ANY letter is highly appreciated by RADIOTELEX and will be printed in the next issue possible.

R.Avalanche recently sent a letter to us explaining why the station has not returned to the airwaves since September 11, 1983. Their major problem is the mailing address as they formerly used the Victoria Road-one and this one has become extremely dangerous to use for both R.Avalanche and Britain Radio Int (BRI) because Home Office-people had called the address owner asking curious questions. So, Avalanche immediately left the address and since is looking for a new one which either is a by now uncertain P.O.Box in Salisbury or even an address in the Netherlands. If this is crowned by success, Avalanche will return to the air and also will clear all the back mail including brandnew studio recordings of the station. So, dear listeners: KEEP PATIENT !!

ADVERTISEMENTS

Podney Sixe is most interested in purchasing tapes of any pirate on 48 and 41 metres that anyone may have recorded on July 1 and 8, 1984. Good prices will be paid, please write to Podney Sixe, 3 Rosewarne Cottages, Rosewarne Downs, Near Camborne, Cornwall TR14 0BE, England. He is extremely interested in the following: 1-7-84, 6234 kHz, UNID with the whistling DJ. 8-7-84, 6240 kHz, station playing tapes of offshore 60's /ABC England, WRLI-interview on RN's Media Network. As well as - 7330 kHz, R.Big Brother and - 7375 kHz, Crystal Radio. And any of the others. He thanks anyone in advance.

The latest on Free Radio

Sunrise R. has send the following transmission schedule to us: First Sunday of the month, 1000 to 1100 GMT (one hour earlier during European summertime). For 1984, the following dates are fixed: August 5, September 2, October 7, November 4, December 2 and 25 (Christmas Day transmission). On August 19, Sunrise Radio starts its new DX-programme ! The DX programme will be transmitted every third Sunday of the month at 0945 GMT (one hour earlier during summertime) on 11415 kHz which is the Sunrise-channel anyway. It will consist of DX-news together with news from the pirate and offshore world as well as messages to our listeners. The Sunrise staff will be happy to receive contributions from our listeners as well as from clubs and magazines.

Their address is: c/o Postbus 41, NL 7700 AA Dedemsvaart, Holland.

SUNRISE RADIO

News has reached us from the FOUR FREEDOMS BROADCASTING NETWORK.

"Radio station VFG - Voice of the Free Gospel has absolutely no connection to any existing air, land, or offshore broadcasting station. Radio VFG is licensed to operate via facilities of the Atlantic Charter Broadcasting Service due to come on the air in late 1984 with studios aboard the vessel MV FOUR FREEDOMS anchored in international waters of the North Sea. Radio VFG is operated by a registered non-profit United States corporation. Unofficial use of VFG materials or the VFG name is strictly prohibited. Radio VFG will come on the air at 7 pm each evening

after Radio WRLI has closed down. Both stations are totally independent of each other and operate through two separate corporations."

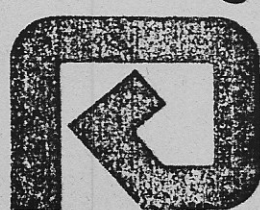

The address is : 806 East Abram , Suite 412, Arlington, Texas 76010, USA, the telephone number (just for those of you who have too much money left) 588 - 0941.

And that ends up RADIOTELEX No.26. Any material contained in RADIOTELEX may be used by any other DX-club-magazine or in any DX programme provided RADIOTELEX is mentioned !!!

A happy holiday and best 73's with

FFFR, RADIOTELEX

01-08-1984

Hello again !

Yesterday, RADIOTELEX returned from its holidays and found a rather full P.O.Box at the local Post Office. So, those who have written in after July 19, 1984 did not get any answer yet.

Please accept this brandnew No.27 as an actual information source.

Happy listening and all the best !

Deadline for RADIOTELEX No.28 is Tuesday, August 14, 1984. Please write.

NEWSSECTION time also is in GMT !

R.Caroline (offshore) has been testing at nights on 594 kHz with music and announcements saying that it will become R.Caroline-channel 2 broadcasting religious programmes and specialist music, not in parallel with 963 kHz. They hope to increase the actual power of 2 kW soon.

R.Apollo Int. RAI, and R.48 Int plan to have a co-site broadcast on 48 metres (6200 or 6240 kHz will be, most probably, Apollo's channel). This co-site shall take place on August 5 and seems to be of special interest for DX-ers as they will use a site in Wales. R.Apollo, which certainly will like to send you also an actual info-sheet (no.9), has 2 addresses available: P.O.Box 319, Edenbridge, Kent TN8 6OE, England as well as c/o RT-address using 'RAI' on the envelope, please. R.48's address is c/o Postbus 19074, NL 3501 DB Utrecht, Holland. Apollo had a ARN (Apollo Relay Network) on 22-07- from Scott Base on 7320 kHz relaying R.Enterprise (Dutch address, same as for R.48) and R.USA, c/o Box 5074, Hilo, Hawaii 96720, USA.

ABC R.Tramore told in a letter recently received that the emission on 7325 kHz were direct from the station but will not be regular, only occasional !

ABC R.Tramore, Tramore, County Waterford, Republic of Ireland.

Whether or not the signals heard on July 22 on 7330 kHz came from a spoof station has to be seen later on (WE believe it was a hoax...-ed) Well, the station called itself Voice of the Lone Ranger or WULR playing only Country & Western music. The DJ Jesse James (other source says he is called HANK !?) said that they were sailing through the Bay of Biscay on the way to the North Sea onboard the MV Trigger ...! The DJ added that they soon will set up a 24 hour service on 981 kHz with a C & W -format....

Crystal R., the new station on 7375 kHz left the address at 27 West Street..... in West Yorkshire and can now be contacted via 190 Monument Road, Edgbaston, Birmingham B16 8UU, England. The station hopes to keep a fortnightly schedule on 7375 kHz playing oldies and rock music. DJ's are Mike Collins, Bob Barton, and Patti Smith.

R. Rabbit-hole appeared again on 41 metres, 7315 kHz on July 22 and announced the address of 32 Victoria Road, Salisbury, Wiltshire SP1 3NG, England. Rabbit-hole formerly was the successor of R. Eastcoast Commercial after that station had been raided some time ago. Anyway, listen out for the station that 'transmits from a rabbit-hole in the heart of Birmingham', hi...

R. Eastcoast Commercial, ECC, was raided again on July 7 and all the site equipment was taken. No one was caught, fortunately, since the station is (was?) fully automatic. The authorities seem determined to close RECC down for good. Contact is still possible via 3 addresses: 1) via RT-address using 'RECC', 2) via 32 Victoria Road... and last, but not least via Commercial Services, P.O. Box 143, Wolverhampton, West Midlands, England.

The new TELECOM BILL became law on July 16, Monday but there is given much secrecy to that alteration and no publicity was noted in the National Press.

Here is information on a new MAILING ADDRESS :

It is available to Free Radio stations, QSO-operators, CB-ers, and SideBanders.

P.O. Box 5, Hunstanton, Norfolk PE36 5AU, England.

The cost for Free Radio stations will be the return postage of the forwarded mail, for the others it will be a nominal sum as a contribution towards cost of the Mail Box plus the cost of return postage.

R. 101 International is planning to continue transmissions on 7445 kHz with approximately 500 Watts E.R.P. Furthermore, their address in Belgium, B.P. 2, B 4680 Gemmenich, shall become the station's main address though their 'Postlagernd', D 4180 Goch 3, West Germany' one is still in use. R. 101's transmitter is said to be located in Ireland.

RRL has changed its main frequency from 6225 kHz to 6240 kHz recently as there has been many problems, namely QRM, on the old one.

R. Waves Int, at the time being the only SW-activity in France, at B.P. 130, F 92504 Rueil Malmaison, France, now issues a QSL-card after 6 months on the air (reprinted afterwards) and also regular monthly info-sheets will be send for 1 IRC from their address. No's 1-8 are still available and No. 9 will be out in August.

14-08-1984

Hello to you !

This is RADIOTELEX with the logs of the last two weekends Plus Free Radio information, mainly from shortwave.

Well, that's just to inform those who are new to our newsletter.

For the 'old' ones, here is an important note :

Look at the address label of the envelope in which you received this RT. No. 28. If there is the number 28 circled red then it is the last issue you have paid for, possibly your subscription has run out ? If you wish to receive further copies of the bulletin, please send your money now by registered mail to our address. Send the amount indicated on top of this page for your country exclusively !

RT No. 29 shall be out on August 29, 1984. Please send in your logs and news ! We need it.

NEWS

According to "FRS goes DX", R. Delmare (Postbus 36, B 2050 Antwerp, Belgium) returned on July 15 relaying the FRS-Holland July tapes. Due to strange propagation conditions, they say, reception was rather difficult in many parts of Western Europe. Therefore, Delmare had the FRSH programmes broadcast again on August 5, one week later than planned due to a modulator breakdown on July 19. The FRSH (Free Radio Service Holland) (Postbus 41, N1 7700 AA Dedemsvaart) should be back again on August 19, 1984 from 0754 to 1400 hours.

Sunrise Radio (same address as FRSH) announced that their DX-programme shall be transmitted at 0945 on the 3rd Sunday of August, the 19th, for the first time. Listen out on 11416 kHz !

R. International re-appeared again on August 5 on 6224 kHz playing Dutch polka music and identifying in the German language. It has been the first time the station has been heard again since August 15, 1982. No address ?!?

ANORAKS IRELAND
310 Collins Avenue West
Whitehall
Dublin 9
Republic of Ireland

R. Eastcoast Commercial returned to the airwaves on August 11 on 7315 kHz after their recent raid announcing the following addresses:
1) RECC, c/o RT-adr and 2) c/o 32 Victoria Road, Salisbury, Wiltshire SP1 3NG, England. One day later, RECC transmitted their tribute to the MOA (Marine Offences Act) introduction on August 14, 1967 playing oldies from the 60-ies and jingles of wonderful Radio London. They gave 32 Victoria Road-address as the address for this special broadcast.

Radio 101 International is now scheduled to transmit each and every Sunday between 0855 and 1025 on 7445 kHz or 7450 kHz with 500 Watts E.R.P. Although R.101 claims to broadcast from Ireland several DX-ers doubt this because of the strange reception pattern for an Irish station (I don't believe it, too. Also 500 Watts obtained by a 3-element beam seems unlikely.-ed). You can contact them via these three addresses 1) P.O.Box 2, B 4680 Gemmenich, Belgium (main address), 2) Postlagernd, D 4180 Goch 3, West Germany, and 3) P.O.Box 55, A 5730 Mittersill, Austria. Reports are welcome and are verified by a QSL-folder. West German stamps are also accepted as return postage.

Richard King, station manager, engineer, and DJ of Misty Mountain R. tells that the broadcast made on April 1 was just a crude test, and that their first special broadcast was on May 6 with a power of about 20 Watts. Their second regular broadcast took place on August 5 and hopefully the final one for this year will be at Christmas. In all they hope to do about 3 broadcasts per year. Address is c/o 32 Victoria Road

The unidentified station on both 08-07- and 15-07- on 6240 kHz playing a variety of offshore tapes including R. Veronica, Stephen Bishop on R. Mi Amigo 259, and also tapes of ABC England and Sunshine R. Ludlow was a station called WABC, presumed broadcasting from Leicester with 20 Watts, the DJ being PAUL GRAHAM making mention of a phone-in number and no contact address being available. They hope to start regular programming soon.

OFFSHORE from APOLLODX

Laser 558 continues much unchanged for some time now with a reported power of only 12 kW and programming is the same with no advertisements included. The DJ's seem to change their programme hours quite often. Female DJ Jessie Brandon, now back on board the MV Communicator after her holiday in the USA, recently was invited by Tony Blackburn to substitute him on his BBC R. London show and was all set to accept when the management of R. London withdrew Tony's offer saying that they would not take on anyone who worked for an illegal station.

R. Caroline is currently testing on 576 kHz relaying their programmes on 963 kHz. This channel should become R. Caroline - 2 carrying religious programmes. This frequency -test follows those on 594 kHz 2-3 weeks before.

However, there are rumours telling R. Jackie from London is interested in to start broadcasting via this second outlet from the Ross Revenge to escape the new legislation in the UK making it more difficult to run a landbased pirate station.

No an information from Neal West / ECC-DX

Wonderful Radio London International will return to the airwaves FIRST of all as a US programme on August 13 and will be aired from a super-power station 15 minutes per weekday (landbased ??-ed). The 13th and 14th programmes will be made by Ben Toney and the rest will come from other WRLI studio staff, the UK stations are now scheduled to commence on the original start up anniversary which is Christmas Eve (20 years to the day). VFG, Voice of the Free Gospel, may come on earlier if the ship is in position and all of the airtime sold.

R. Walleri, the 70's station from Ireland has returned (c/f RT 27) and the address is supposed to be the following:

199 Great (?) Abbey Drive, Dublin 13, Republic of Ireland.

R. Avalanche now HAS a new address but are not sure when their next broadcast will be. The address is c/o Postbus 19074, NL 3501 DB Utrecht, The Netherlands. What Phil Abbot also wrote is that their silver pen mysteriously has stopped working and dried up. He suspects TELECOM interference....

Sunshine R. in Ludlow continues unchanged, saying that they will continue indefinitely, security has been stepped up at the station which has included the installing of an automatic switch on/off device ("They cannot take a time-clock to court!"), barriers on the farm gate and the wheels removed from the caravan housing the transmitter to prevent towing away. They broadcast on 1017 kHz and welcome letters to : Villa Farm, Greete, Ludlow, Shropshire, England.

/APOLLODX

In late August there will be a meeting between the operators of several of the most well-known British SW-stations, e.g. R. Eastcoast Commercial Britain R. International, R. Apollo, UK-GM, R. Avalanche and possibly R. Krypton which will hopefully lead to more co-operation between these stations, leading hopefully to less QRM and more reliable appearances by the stations. One thing that is hoped may come out of the meeting is the forming of a Free Radio Network, similar to the '6235-7325'-net in the late 70's, where four stations will appear on the same frequencies on the 1st, 2nd, 3rd, and 4th Sundays of each month, which will mean that listeners will know what stations will be on and on what frequencies. News on the outcome will be announced in the APOLLODX - programme next month.

/APOLLODX

A word about Apollo : The transmission on August 5 on 6200 kHz came from the Scott Base transmitting site, not as a co-site broadcast with R. 48 from Wales, as planned. The whole plan for that Sunday had to be changed because it was Howard Bell's (R. 48) Wedding Anniversary and his wife wouldn't let him out that day, hi.... Anyway, anyone who has heard Apollo and R. 48 on August 12 heard signals from Welsh territory.

News from LS - LAUTSPRECHER, a FR-magazine in the German language :

LS will appear also in the future. At the end of August/beginning September only a newsheet will be issued which is free of charge for the regular LS subscribers. Later in the year, a more lengthy issue of LS will be released, probably as '2-issues-in-1' -copy. You can write to LS at Postfach 433, D 2980 Norden, West Germany.

The next programme of R. Marabu will be transmitted in a month's time due to technical problems. RMI, c/o RT-address.

And that ends up RADIOTELEX No. 28. Keep on fighting for Free Radio,

73.

28-08-1984

Hi !

A slightly new layout and slightly raised subscription rates for the foreign countries, too (see above), we must admit. But that was introduced to meet exchange fluctuations and the costs beneath the postage fee. However, the price isn't too high for a fortnightly infosheet, isn't it? It also would be most appreciated if also YOU would write in with news, loggings, and every bit of information of which you think that it might be important also for the others. One idea suggested by a contributor is to publicize also logs together with additional news of Dutch mediumwave stations. We at RADIOTELEX think that this is a good idea. We also would write about British MW-operations but the thing about that is that they are normally not heard in the rest of Europe, the territory RADIOTELEX normally caters for. Shortwave enables everyone to tune in everywhere to hear anything. Mediumwave: Try it... (...perhaps you'll like it !?!) A good reason to ask Paul Davidson at Anoraks Ireland if he still issues his newsletter and if he is willing to provide an Irish MW + SW update!

One thing to add to this introduction:

The rates above are valid as of September 3, 1984. Deadline for your contributions to RI No. 30 is September 11, 1984.

R-Albatros, 7353 kHz, 26.12.1984
R-Free Scandinavia, 6200 kHz, 1.4.1984

KOL Europe is the name of the station which tested under the name of WABC (ref. RT 28). The station used the new name first on August 12, 1984 when transmitting on 6224 kHz when WABC had signed off at around 1000 - 1100 GMT. The station uses the new contact address for Free Radio stations at:

The correct address for R. Ualleri from the Irish Republic who changed recently from the out-of-band channel 6870 kHz to 6317 kHz is:
199 Grange Abbey Drive, Donaghmede, Dublin 13, Republic of Ireland.
The modulation at the moment seems to be a bit low.

RADIOTELEX
Post Office Box 700 825
D 2820 Bremen 75
West Germany
The latest on Free Radio

Weekened Music R. soon will have their 4th birthday programme, probably on 6310 kHz. Their address is 42 Arran Close, Cambridge, England.

R. Atlantis SW is planning to have its next transmission on September 9, 1984. Reception is quite good on 6200 kHz or a little bit higher and I suppose they will use this frequency again then. Contact via RT-address. If R. Marabu Int will come via this station as a relay is not sure as it hasn't been announced. If they are on, they will use the same address.

Several DXers, especially from the UK, are now almost 100 % sure that R.101 Int is NOT an Irish operation. Due to a very similar fading pattern to that of R. Batida on August 19, R.101 has been received well and must be located on the Continent ! Postfach 2, B 4680 Gemmenich, Belgium is their address.

OFFSHORE NEWS

Laser 558 have announced they will soon be going on 24 hours. However, in an interview in Broadcast Magazine, the programme controller who is living in London admitted that although various companies have promised advertising contracts, none as yet have actually signed anything. If they have no advertisements by Christmas, he said they will have to have a serious re-think about the future of Laser. He added the possibility of using religious programming as a way to get money was not out of the question as there are plenty of US religious organisations willing to pay well for air-time.

Michael Mc Donagh, Managing Director of R. Na n Gael told the following about the station in a QSL-letter:

They started on February 2, 1984 on 92.2 MHz / FM and are now broadcasting 24 hours a day on 92.2 MHz, 1350 kHz, and 6340 kHz with powers of 10 W, 200 W, and 500 W respectively. The correct address is : R. Na n Gael, Mountgorry, Swords, County Dublin, Republic of Ireland. Their telephone connection is: Ireland-01-403770 + 403629.

UNIDENTIFIED

Who heard or knows more about the strange appearance on August 12, 1984 on 6210 kHz, playing various tapes of KFBK, FEN Tokyo, and American Forces Vietnam Network, between 1050 and 1218 GMT. I think it is a bad joke to relay military stations - they are just not worth it...

On September 9, 1984 R. Waves Int has a special broadcast featuring only tracks from the successful Howard Jones LP "Human's Lib". Apart from that, RWI will celebrate its 1st birthday in mid-November 1984. All listeners of RWI themselves could produce a 30 or 45 minutes show which will be broadcast through the RWI-transmitter. The normal frequency for RWI is 7338 kHz in the 41m band and, as observed last Sunday, the modulation quality has been improved a lot. Their address: B.P.130, F 92504 Rueil-Malmaison CEDEX, France.

UNSHINE RADIO
IN TUNE WITH SHROPSHIRE

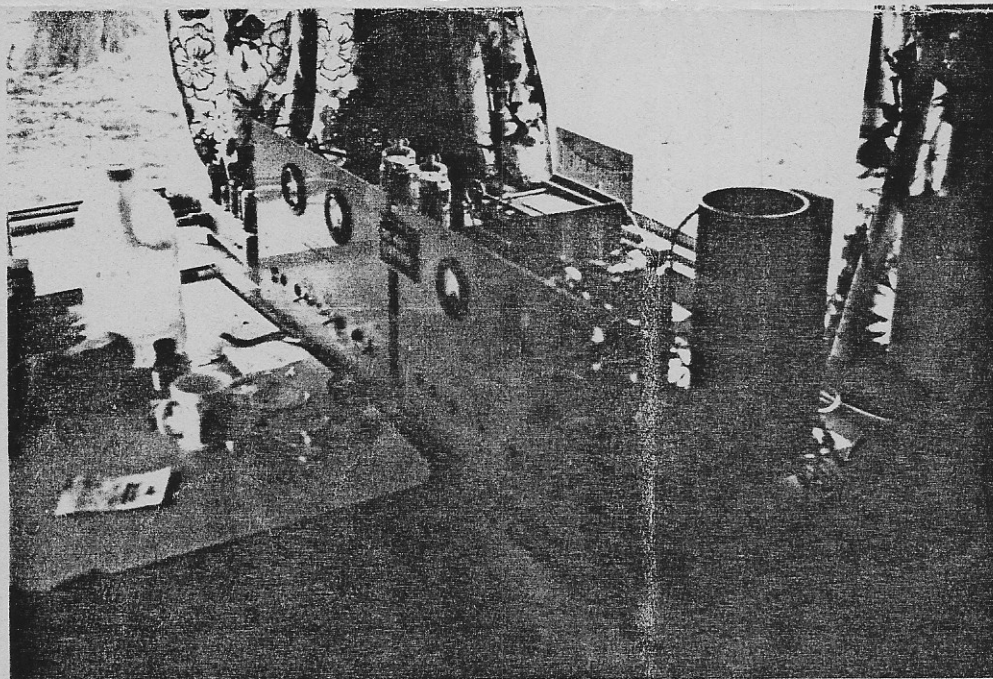

Sunrise R. has its next scheduled transmission on September 2 (ref. RT 26) on 11416 kHz between 1000 and 1100 GMT. Their planned 3rd Sunday DX-programme on August 19 couldn't be heard here in Northwest Germany due to heavy RTTY-QRM. The address for Sunrise R. which normally present excellent funk-music programmes, is : c/o Postbus 41, NL 7700 AA Dedemsvaart, The Netherlands

Free The Airwaves is a group which supplies legal advice for Free Radio operators in the UK who are caught whilst offending the Wireless Telegraphy Act. Well, I print this because I think it is of necessity to know about events that could happen to you. For further information write to: Free The Airwaves, Box CCR, c/o The Bath House, Gwydir Street, Cambridge, England. Where help is needed immediately, the legal advice contact number is 0533 - 740432 from within the UK.

Well, that unfortunately leads to the end of RADIOTELEX. If there would be 2 or 3 more regular reporters we should be very happy and won't have to fill the gaps with promo material or too much paper cuttings. Therefore, as an extra for you, the critical FR listener, a questionnaire is attached, recently released by R. Apollo International. Please fill out the paper and send it (together with a reception report ???) to RAI, c/o RT-address. Well, before we leave you for this time, two interesting things printed in the following :

On the left hand, a look inside the SUNSHINE RADIO / Shropshire transmitting caravan showing the 500 Watts mediumwave transmitter and modulator. On the right a Free Radio Top Ten cut from a British newspaper.

Bue for now, FFER **RADIOTELEX**

Top Ten rebels of the airwaves

1 BIGGEST, richest most popular - Laser 558. Slick American DJs who spare the chat to push the music. Audience: Five million.

2 RADIO JACKIE, Morden, SW London. Well established - the hero of the new wave pirates and supported by local politicians. General music, own local news team, chat on local issues. Audience: 250,000.

3 KFM, Stockport. Bright, enterprising, calculating. Runs only four news bulletins a day. Audience: 250,000.

4 SUNSHINE RADIO, Shropshire. Outdoing the local Independent, Radio Wyvern, with news, chat, info, middle-of-the-road music, pop. Audience: Around 200,000.

5 SKYLINE RADIO, SE London. Community broadcasting from 'Pirate Road' - a South London street boasting a dozen pirates. Variety of music, local information - even police messages. Audience: 100,000.

6 BORDER RADIO, Twickenham. Temporarily closed while hoping to be considered for a legitimate Community Radio licence, but at best a 24-hour local agony column. Audience: 33,000. No ads.

7 LONDON Greek Radio, N London. Goes from 7 a.m. to midnight. Much loved by 100,000 Greek Cypriots.

8 STORETOWN Community Radio, Birkenhead. All day, every day, oldies and chat. Maybe 100,000 people listen.

9 DREAD Broadcasting, otherwise DBC Rebel Radio, Portobello Road, London. Rastas play reggae. Great for picking up all the latest slang.

10 HORIZON Radio, in Pirate Road again. Jazz, funk, and real foot-tapping music Wednesday, Thursday and Sunday at least.

12-09-1984

Hi to you all !

It is always encouraging to ask for more participation in one issue
 and to have the wanted response already in the following number.
 Yes, two more people than regular took part in sending in their items
 (logs and news). Thank you !

As you will notice below, we changed the log section a bit , dividing
 the until now mixed S-rate (e.g. a S 2 from a UK-reporter and a S 3-4
 from a Continent-listener were written as S 2-4) into three individual
 columns: UK - CON - SCA . So you might be able now to learn a bit more
 about propagation , won't you ? Especially for this reason, we'd like
 to hear more often from the Scandinavian people. Think about it !

The news section from now on appears in alphabetical order, also to make
 it easier to find a station in a back issue to compare the different items.
 This was, by the way, a suggestion by a contributor. Feel free to write
 in with any of your thoughts ...

Deadline for RADIOTELEX 31 is September 26, 1984. Remember to post your
 logs etc. on the Sunday before (at latest !), September 23, 1984 !

LOGBOOK TIME IS IN GMT !

The Dutch station mentioned in RT 29 is called R.Rono + Turbo, not Romo !

NEWSSECTION " TIME IS GMT !

R.Apollo Int will no longer use P.O.Box 319, Edenbridge,... in their broadcasts because the address-operator hasn't forwarded Apollo's mail for some time now so Dave Scott thinks that it is a waste of time. He instead plans to take up the new Hunstanton-address to use together with the RT-address. Anyway, the 319-Box is open for Apollo until January 1985 but I really advise you not to use this one as it seems to be very unreliable nowadays ! R.Apollo ,by the way, will take another rest now as he will be off on holidays soon . Expect the next transmission on October 7.

R. Big Brother tested on 6225 kHz on September 9 for the final time announcing regular transmissions once a month to start very soon. RBB is still looking for a mailing address, plans for using the address of a pub in Osnabrück have failed due to security reasons. The station also transmitted on FM 100.7 MHz that day, starting at 1100 as announced before on short-wave, with 15 Watts. They also planned to use a linear amplifier of 100 Watts but this one has not been switched on, as announced. In the future, RBB plans further broadcasts on FM and simultaneously on 48m as the 41m band has proved to be not suitable for their purposes. Future programmes shall include music as well as information on new media and free radio.

R.Black City which was on September 9, too, now uses the FRS mailing service, Postbus 41, 7700 AA Dedemsvaart, The Netherlands. They tested on 7320 kHz with music from Jimi Hendrix, Bee Gees, and Rory Gallagher.

R. Caroline /Offshore has, following recent information, introduced the 576 kHz-channel to get better into the London-city . The transmissions on 963 kHz are, due to the higher frequency, unable to provide good reception there because of the high-rise buildings. After a recent visit on the Ross Revenge we now know that the power on 963 kHz is about 12 kW, and on 576 kHz 3 kW . They plan to change the two transmitters soon, i.e. 576 with 12 kW and 963 kHz with 3 kW.

Crystal R. from West Yorkshire currently uses a 12 Watts rig plus a 65 ft longwire for their 41m transmissions on 7375 kHz. It is also possible to hear the station on 48m soon when they've got a 80 Watts transmitter + 75 ft longwire antenna available for broadcasting on 6 MHz as well.
Address: 190 Monument Road, Edgbaston, Birmingham B16 8UU, England.

R.Delmare (Postbus 36, B 2050 Antwerp, Belgium) continues testing on 6205 kHz with 50 Watts of power which shall be raised up to 600 Watts in the near future. Meanwhile, the Free Radio Service Holland has announced that they haven't received any letters via their P.O.Box 41 in Dedems-vaart for almost 2 months now !

R.Earth Int has a new mailing address: Box 321, Chicago, Illinois 60666, USA. They are relayed from time to time on R.Milano Int / 7295 kHz.

According to their latest newsletter, KBC-Radio still uses Postbus 725, Arnhem, NL. They hope to return via R.Delmare soon. Alternatively, try out 6222 or 6262 kHz on Sunday mornings and 7110 kHz during night-time hours. Their next newsletter shall expire in November this year.

News about Laser 558 : It appeared in the London Evening Standard the week before last that the UK co-ordinator of the station is Roger Parry who arranged everything in Britain, he works for the BBC as a TV news reporter and also produces radio programmes on Radio 4. The owner of Laser is Philip Smith, an Irish hotel chain owner, who is the financial backer behind EURAD S.A., the company that owns Laser.

Mi Amigo R. Int from Ireland announced on the September 2 transmission that he has rubbed his crystal up about 2 or 3 kHz and that he didn't really know what frequency he was on. He had done this because he had had complaints from Westside that he was causing splash to their channel. Mi Amigo hasn't answered reception reports the last time. c/o North Street, Swords, Co.Dublin, Republic of Ireland is the address.

The following info was picked up from BRT Radio World of August 26th :

A political pirate was observed in the area of Nottingham for the past two months or so. According to a British daily newspaper, the Guardian, the station without a name is heard on 999 kHz, the AM-channel of the local IBA station Radio Trent, jamming the IBA signal out during the station's news bulletins and putting out recorded material supporting the striking miners' union leader Mr. Arthur Scargill instead. Meanwhile, Radio Trent has complaint to the Home Office/DTI and it is likely that official steps are being taken to pull the pro-Scargill pirate off the air. The station was also reported on FM lately.

The programme of the Satellite Broadcasting Corporation on September 2 via the transmitter of Westside R.Int was an old tape as they announced 7317 kHz and possibly 25m (hello, R.ECC !). Prince Terry also said he put out Satellite BCC out from 0600 - 0900 on 11463 kHz that day. Satellite used to use Postbus 41, Dedemsvaart.

Sunrise R. in fact has been heard in Germany with the DX-programme on August 19. The transmission took place on 11400 kHz and was noted there between 0904 - 0925 GMT. c/o Postbus 41, Dedemsvaart, NL

R.Titanic Int did its 9th anniversary programme on the 9th of 9th (September, I mean...) ! In the 26m band, 11430 kHz, they announced, Titanic will be back again on three occasions this year and possibly the show will be repeated soon in the 41m band around 7350 kHz. DJ Mark Brown asked for reports from all listeners to be send to their address Postbus 41, Dedemsvaart. He also states that he hasn't had mail from Dedemsvaart for some time now (the same as happened at FRSH, I think !!-ed). RADIOTELEX asks all stations which use Postbus 41 at the moment if they received mail from that address ! Please let us know as we might offer our address for contact instead ! Oh, one thing to add to Titanic : The UNID on July 22 on 11430 kHz was Titanic (c/f RT 27) !

R.Tonair Int is a station from Southeastholland which could be noted for several times lately (August 12 !!), September 2 + 9. The programme consists of test-announcements in Dutch and English as well as of CQ-calls to other stations (see log of 09-09.-ed). Address for Tonair is: Postbus 36, 7010 AA Gaanderen, The Netherlands.

UK Radio and R.48. The broadcasts on 6240 kHz and 6220 kHz heard on September 9 were parts of an experimental test broadcast in which three different stations should have took place but in fact only 2 appeared (see above !). The plan was that each station should have taken over 45 minutes between 0845 and 1100. Reports are verified at P.O.Box 143, Wolverhampton, West Midlands, England. More on the whole project when I'm allowed to !

TODAY, THERE'S NO PLACE FOR MORE ! BYE+73. FFFR

26-09-1984

Hi !

Again, many more contributions than ever before ! It really amazes
 us how many of you can write if they only find the time to, hi...
 Special thanks over to Scandinavia from where extremely useful material
 arrived !

To start with, the usual loggings with three different columns for the
 S-rate (Signal strength), which are: UKingdom - CONTinent - SCAndinavia.
 Please, be so kind to mention your receiving-equipment the next time you
 write in, O.K. ? The date for that is October 7, 1984 at latest, your
 letters have to be here on October 9/10 (DEADLINE).

LOGBOOK Time is in GMT !

R.Apollo International (c/o P.O.Box 5, Hunstanton, Norfolk PE36 5AU, UK or c/o RT-address) now managed to get in contact with the OP of P.O.Box 319 at Edenbridge. He said that the mail for Apollo hadn't been send on for a while because he was on holidays. The payment for the P.O.Box 319 runs out at the end of the year by which Apollo will leave that address ! Anyway, please use the above addresses at Hunstanton and Bremen from now on only ! You'll be sure then to have your letters forwarded much more quickly ! On page three, you can admire the new R.Apollo studio-

R.Atlantis Shortwave (c/o P.O.Box 700 825, D 2820 Bremen 75, West Germany) is planning to have their next transmission on September 30 on 6202 kHz starting at 0830. Again, a tape of R.Marabu Int (same address) will be put on the air.

R.Batida (also c/o RT-address) will have its first birthday show in October. There will be no more fixed starting times for Batida's transmissions in the future because of the always changing propagation-situation. A possible time for the future might be 0900 or 0830 GMT in the 41m band, as usual.

The Clandestine Listeners Club Germany, CLCG, with the address of P.O.Box 540 101, D 4100 Duisburg 11, W.-Germany will have no more transmissions via R.Waves Int from France as we are informed. The only station which will keep relaying CLCG's programmes is Music R.Holland on 7360 kHz. R.CLCG now looks for stations on shortwave or mediumwave which are willing to co-operate with the CLCG !

ADVERT

The CLCG-Magazine: Free Radio Information. Sample copy for 2 IRC (Europe) or DM 2,-- (W.-Germany). Contact: Wilfried Meyer, P.O.Box 540 101, D 4100 Duisburg 11, W.-Germany.

Crystal R. is definitely not from West Yorkshire. The station can be contacted at 190 Monument Road, Edgbaston, Birmingham B16 8UU, England. (For more information see RT 30 !)

R.Eastcoast Commercial wants to continue every first Saturday of the month with their ECC-DX-programme. Frequencies to be used are 6280 or 7315 kHz.Addresses: c/o RT, c/o 32 Victoria Road,Salisbury,Wiltshire SP1 3NG,England.

As it seems, the Postbus 41-mailing address at 7700 AA Dedemsvaart is operating normally again since the beginning of September - Peter Verbruggen of FRSH has received the mail of 10 weeks now O.K.

An urgent message from Sunrise Radio : they asked us if we would inform our readers about Sunrise's schedule for October which is slightly changed:

During October, Sunrise Radio will transmit the Steve Jones show on the SECOND Sunday in October, that will be on October 14. From on November, we will back again on normal schedule - on the first Sunday of each month. Also, WE have not received any letter or any report on our

Sunrise R. continued...

last four transmissions. We don't know what is going on.

Well, that gives at least another problem with the events happening around Postbus 41 in the Netherlands... We at RADIOTELEX again ask all stations concerned to contact us to find a solution, O.K. ?

The next one is R.Tonair Int (c/f RT 30). At first, we'd like to apologize for giving a wrong address the last time. The right one for this Dutch station is Postbus 21, 7010 AA Gaanderen, The Netherlands. As announced on their testtransmission on September 16, R.Tonair plans to start regular programmes on the first Sunday in October (the 7th). The station should improve their QSL and infosheet a bit ! Remember that RADIOTELEX offers mint Dutch stamps to use together with an envelope as a SAE, that's far cheaper than sending IRCs...

The thing about the UK R.Int transmissions on September 9 and 16 is:

The frequency chosen for the 'experiment' (c/f RT 30) is 6240 kHz. Therefore, if R.48 was on the air that day as logged on 6220 kHz it was not part of the experiment (9-9-).

Now to the section of September 16 : The loggings are classified in UK R. Int (1) and (2). The UK R. Int (1) is the real one and in fact uses P.O.Box 143 at Wolverhampton. The No.(2) is not known yet ! That is the one with the female DJ - Kelly Brown. The station which should have taken part in the experiment is No.(1).

So, let's see what will be on the next weeks...

A UNIDentified has been mentioned to RADIOTELEX already on the last deadline but, as you probably have noticed, we hadn't had enough space to print all of the information.

The logging concerned is the one on 7370 kHz on September 2, 1984 (c/f RT 30). Between 1200 and 1215 GMT, electronic music has been heard (instrumental) and also some (probably Dutch ?) announcements were made at the end. I wouldn't have used such an old 'forgotten' UNID in the current issue if this station wouldn't have appeared again in the logsection of September 16 with the same details.

Well, the station has been heard in the UK (as we can easily see) with a fair S-rate (3) both times. As I got the whole SINPO (35533), it can also be seen that there has been no interference at all, so the channel has been clear. As it was some type of instrumental electronic music, I guess it could have been R.Mirage Int., looking at the type of music and the waveband. Has anybody heard anything on the dates concerned ? Information and suggestion are always welcome.

According to their latest info-sheet, World Music Radio, Postbus 4078, Amsterdam, The Netherlands, plans to start transmissions on shortwave from Italy via the former 91-Radio in Pavia which has merged with WMR. Watch out on 9845 kHz as well as on 26060 kHz, the latter one shall be run on an experimental basis. At the moment, WMR is to be heard via that station around the clock on 91 MHz FM stereo.

And that ends up RADIOTELEX No. 31. All news, views, and suggestions are needed here, indeed, and are always welcome !

I know that it is not easy to write much about a scene when it is not that vivid the one day or another but try to make the best of it !

10-10-1984

A nice hello to you !

Conditions on the shortwavebands were rapidly changing the last two weekends so that one cannot predict whether or not a "nice Sunday" with lots of stations or a "sad one" will follow...

Participation in the different sections of RADIOTELEX could still be a bit more, I think, so please think it over and send in your stuff, also if it is only a little logsheet (Hi, Scandinavia, you certainly have more than two listeners, haven't you ?!).

One important note :

RADIOTELEX will change its address as from October 22, 1984 (Monday). This has become necessary because of the Post Office changing the premises. The new address which should be used from October 20 onwards is: P.O.Box 750 925, D 2820 Bremen 70, West Germany. Contributions from outside West Germany should use the old address until October 16, 1984 at latest.

Deadline for RADIOTELEX No.33 is October 23/24, 1984 and remember the new address !

On with the loggings, time is GMT !

NEWS

Time is GMT, too !

To start with in today's alphabetical listing is R.Apollo Int.
The next Apollo transmission will take place most probably on October 21 on either 6200 kHz or 7330 kHz, depending on what programmes will be featured. Most of the questionnaires sent out by Apollo and RADIOTELEX asking what people do or do not like concerning Apollo's programmes have been returned (thank you very much !) and the main result turned out as expected by Dave Scott: Continent listeners prefer 41metres and UK people like the 48m frequency more as it gives the best reception in the particular area . So, if 41m will be used, you can be sure of a Dutch and German-service (APOLLODX is featured anyway !). Also prepared to be transmitted soon is a large MOTOWN-special (with John Allen ?). Another exciting item is that R.Apollo soon will be relayed via the Oslo-pirate SNPA on 101.5 MHz FM in Norway.
Apollo's 2 addresses are : c/o P.O.Box 5, Hunstanton, Norfolk PE36 5AU, England or c/o the new RT-adr. The Edenbridge-service is no longer used !!!

R.Atlantis Shortwave (c/o the same two addresses as Apollo !) was heard again September 30 on 6202 kHz. The programme came via a new, own transmitter giving an output of approximately 10 Watts which resulted in a slightly weaker signal compared with the last two transmissions before. RASW plans to be back in December (Christmas) 1984 with a broadcast on shortwave (6202 kHz), in parallel to mediumwave (263m=1140 kHz) and 105 MHz FM.

R.Batida in the future offers copies (studio quality) of the respectively last show in a slightly larger quantity than before. As of today, all listeners have the possibility to obtain an original R.Batida-prog recorded on a TDK C-90cassette (CrO₂). You can have a copy today by sending a DM 10,-- note to R.Batida, P.O.Box 750 925, D 2820 Bremen 70.

Radio Batida - Germany's leading radiostation in funk, soul, disco, and reggae.

Britain Radio International transmitted their 5th Sunday schedule of September on October 7 on 6240 kHz. BRI announced two mailing addresses:
1) c/o 32 Victoria Road, Salisbury, Wiltshire SP1 3NG, England and
2) c/o Postbus 19074, 3501 DB Utrecht, Holland. Furthermore, listeners were asked to send in comments concerning their experiences in receiving BRI for then a change in broadcasting times may be considered.

Funkytown is the name of a new programme heard via Milano Int. It is scheduled for every Sunday afternoon at 1300 on 7295 kHz but has already been heard at other times (see logs !). The musical-formate consists of disco, funk, and synthi-pop music, two DX-spots produced by Germany's largest DX-club, ADDX e.V., are also included. Obviously, Funkytown is operated by the people behind the former German SW-pirate Radio King Kong Int. Address: Postfach 211, D 7146 Tamm, West Germany.

Mi Amigo R. Int announced 6285 kHz and 12352 kHz (!!) on September 30, though one of the mentions was a frequency of 11352 kHz and the power was said to be 40 Watts which will eventually increased to 200 Watts.

R.Mirage Int, c/o Postboks 2778, Elverhoy, N 9001 Tromsø, Norway plans to go on shortwave 41 metres soon with a Scandinavian service in Swedish and Norwegian. As not much has been heard of Mirage so far, even that will be a nice turn-up on the dial ! Listen out the next Sundays !

Another Irish operation is Shamrock R.Int heard on 6294 kHz on October 7 in the UK, looking for a clear frequency as he said on the transmission. The power was 15 Watts and the frequency in the future probably will be 7320 kHz. On the first regular broadcast, he also will announce an address.

S.O.S - The Sound of Switzerland was on the air first on September 30 announcing the FRS-address in Dedemsvaart, Postbus 41. The signal was not too strong and the transmission was announced as a test. As it was a 5th Sunday, we wonder if there is any connection between R.Madison and SOS, as Madison once mentioned a 5th Sunday schedule.

R.Titanic International finally received its mail from their contact-address at Dedemsvaart but got only two reports for their 9th birthday show on September 9 - one from Germany and the other one from Sweden. So, as a matter of fact, the mailing address seems to be O.K. again also for future usage ! The staff was also surprised to receive a reception report from New Zealand, but it was just for a relay made by KIWI R. (ex Freedom/Star) on April 20 between 0700 and 0730 GMT on 5825 kHz. The report came from a listener living some 200 miles away from the transmitting site of R.KIWI at Hastings. Maybe another relay will be made in that area in the future. On the other hand in Europe, the next transmission of Titanic has still to be waited for with impatience....some say the 500th test transmission is not too far away ???!

On October 7, a predecessor of the Wonderful Radio London International radio ship could be listened to on 7315 kHz - R.London with presenter Chris Elliot. The DJ gave an address of P.O.Box 255, Venus, Texas 76084, USA and presented the British Top Twenty. One listener suggested that this has been most likely a recording of one or more 15 minute-shows which come every night via the Mexican station XERF with 250 kW put out on this occasion via- guess what and look on the frequency - R.Eastcoast Commercial.

XX

A message to all stations using the RADIOTELEX address:
Please use the new RT-address in all your programmes after October 21, 1984 (of course also if you are on that day !). New RADIOTELEX promo-spots will also be available soon on cassette in English and German. Please write in if you would like to use this promo too !

And that ends up RADIOTELEX this time. Please excuse that there are not so many news but we hope to have some more next time. Also the printing quality is not as it should have been this time. Some of the issues have a white second page - this was done by accident. Some more to say "sorry" at ? Write in soon !

"All that we see or seem is but a dream within
 a dream..." -E.A. Poe

Certainly not a dream is that time has come to compile another edition
 of RADIOTELEX, the thirtythird, to be exact. The reason for the sometimes
 changing release-date of the info (either on Wednesday or on Thursday) is
 that, on some occasions, not enough material has arrived here at RT, so
 the actual deadline has to be postponed one time or another. Please tell us
 (especially the readers from Germany) if you ever haven't received your copy
 before the following Saturday !

Anyway, yesterday we thought we couldn't be out today (Wednesday) and now
 it has changed from one hour to the other...oh, and thank you very much
 for having taken part in contributing, but it STILL COULD BE M O R E !!!!

The next deadline is around November 6/7, 1984 (...the latter being my
 birthday, I must admit...) for RADIOTELEX No.34.

THE LOGBOOK

TIME IS IN GMT !

Let's start with the 13th of October, a Saturday. Just to let you know how
 much activity there is also on the mediumwave, I've listed those , too:

*kHz	*Station	*Time period	*Language,remarks	*UK -CON-SCA
531	Sunshine (Dublin)	0747	E	2 - -
558	R.Laser 558	0743	E	5 - -
576	R.Caroline	1322 - 1602	E,second outlet,//963kHz	4 - 2 -
738	R.Nova (Dublin)	0751	E	5 - -
963	R.Caroline	0758 - 1603	E,the other outlet	5 - 3 -
1017	Sunshine (Ludlow)	0802	E	5 - -
88	R.Dublin	0812	E	2 - -
1611	R.Nightrider	0023 - 0112	D/E,PB 25,Emmercompascuum/NL	-1/2-
1618	R.WBI	0013 - 0019	E/D,PB 41,8080 AA Elburg/NL	- 2 -
1620	R.Moonlight	0020 - 0115	D,PB 53,9600 AC Hoogezand/NL	- 1 -

Well, only one QSL-card arrived here :

UK Radio (2) 6240 kHz 37 days SAE info,"QSL-card",2 IRC's return

NEWSSECTION

R.Apollo opens up the file. They apologize that they haven't been on October 21 because of a bad cold Dave Scott encountered the last week so that he wasn't able to do his shows without losing his voice somewhere in the middle... Furthermore, it would have been almost impossible to hang up the antenna due to gale force. Dave will use 48m definitely when he will be on (probably on October 28 ?)to explain to all his UK-listeners who wrote in

Apollo continued... after August to P.O.Box 319 why they had no reply yet. Apollo now uses the following addresses: P.O.Box 5, Hunstanton, Norfolk PE36 5AU, England and the new RADIOTELEX one: P.O.Box 750 925, D 2820 Bremen 70, W.-Germany. Please remember that it is cheaper to use the latter one when writing from the continent !

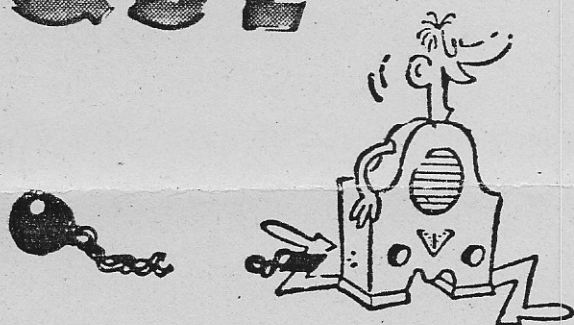

Another station using this convenient service and also the Hunstanton - address is R.Atlantis Shortwave.

They repeated the final half hour of their September programme on October 21 on 6225 kHz. During their additional 30 minutes show they announced that this was done due to poor reception conditions on that day (I guess conditions haven't been better on October 21...-ed).

Furthermore, a new QSL-card should be available very soon and reports are most welcome at the addresses mentioned above. Atlantis SW hopes to return in December before X-mas with a special broadcast on SW, MW, and FM (c/f also RT 32 !).

R.Batida, c/o RT, intends to broadcast on FM 104 MHz stereo to the city of Hannover and the surrounding area with a power of approximately 400 Watts E.R.P. in addition to shortwave (simultaneously ?).

QSL

Greetings to all
Radio Telex readers.

Big Brother Osnabrück.

Big Brother

R.Big Brother,
c/o RT-address,
from Osnabrück,
West Germany,
made its first
official broad-
cast on October
21 on 6240 kHz,
48m band. They
announced their
plans and inten-
tions which are
set to deal main-
ly with the so-
called New Media
and Free Radio.
The future will
bring one irre-
gular appearance
per month, the
next transmission
therefore will
be in November.
When contacted
by the station

we were told that only reports will be verified by QSL-card (three different available) and letter if also the listener has written what he/she thinks about the particular broadcast. RBB also knows that people from foreign countries have almost no chance of understanding the German language programmes or even commenting these but they, too, are asked to send informative reports not only writing about the technical side of reception. So far with this station from Northrhine-Westfalia.

Concerning the 4th Sunday broadcast of Britain Radio Int in October : This will include a Free Radio spot produced by Johnny Best on Radio Exclusief, a Dutch FM station (102 MHz/stereo) located at Nijmegen/NL. It will probably occur in the German service of BRI between 0930 and 1000.

ADVERTISEMENT

Hello, nice people, the same UK-DX-er as before offers you the following cassette recordings of free radio stations. Here is the lengthy listing:

All of these are unique recordings and no copies are therefore available

Date of rec.	Station recorded	Length
14-o8-1984	R.Caroline, 5.36-6.36 am	60 mins
28-o9-1984	Invicta Sound (ILR) tests, also Caroline from 9.21am (29-o9-1984)	60 mins
28-o9-1984	Invicta Sound tests, B-side Dave Lee Stone (Laser) from 10.53 am	90 mins
29-o9-1984	Simon Barrat on Caroline, 9.57-10.57 am	60 mins
06-10-1984	Roger Day on Invicta Sound, extract of "Solid Gold Saturday"	90 mins
07-10-1984	David Lee Stone "Sixties Sunday", 10.00 - 11.00 am	60 mins
08-10-1984	David Lee Stone "Evening Show"	60 mins

* The price of the CC's
 * advertised beneath is
 * £ 3 Sterling an hour
 * incl.postage + packing.
 * Payment must be made by
 * British Postal Order,
 * International Money
 * Order, or by cash in re-
 * gistered envelope. No
 * other forms of payment

 * country outside Europe
 * will be by surface mail.
 * When writing to RADIO-
 * TELEX and when you are
 * interested, please en-
 * close 1 IRC or SAE for
 * forwarding your letter.
 *

R.Caroline have adjusted their modulation on 576 kHz resulting in a much better better signal outside of southeast England, they are now nearly as good as Laser 558 in the Midlands although it is thought that the switch over between the transmitters on 576 and 963 kHz is yet to come.

On Monday, October 29, R.Dublin will celebrate its 18th birthday as advertised on 6910 kHz on October 23, just after the 1700 newscast.

The following has been taken from the Weekly Report No.24 issued by ANORAKS UK:

R.Free City is expected on the air the next Sundays between 0800 and 1300 They could be on the air on 6275 or 6235 kHz (please compare with the UNID in the log of October 21 !-ed). Free City also hopes to be on every week for the immediate future, although they have never yet kept to an announced schedule.

A correction concerning the Funkysound operation on 7295 kHz via R.Milano, they are not called Funkytown as written in RT No.32.

The author of the book "The Lid off Laser 558" , Paul Alexander Rusling, a former Caroline DJ who played the main part in helping to set Laser up and who was then discarded by the US management when they knew he didn't like their style of management, has had his Kent pub attacked by a fire bomb and burned down. He says it was done by Laser people and has said this to the police. The Department of Trade and Industry (DTI) are considering ways to make life more difficult for Laser (and also for Caroline, supposedly...), mainly by trying to clamp down on the illegal tendering which regularly comes from Essex and Kent.

The Radio London "BIG L" transmission heard on October 7, 1984 (c/f RT 32) was an off-air recording of the FIRST "Wonderful Radio London Int"-show that was broadcast over KXOL-AM (1360 kHz) in Fort Worth on Saturday September 22 1984 7am-8am local time and put out ,as we supposed, via the transmitter of R.Eastcoast Commercial. And there is no reason to deny this.

R.Mirage was on October 14 with a test on 7350 kHz but he didn't get far due to his antenna having collapsed.

Raids. Around October 11/10 there was a big clamp down on London pirates by the DTI after the IBA had complained to them about QRM from the pirates to the new ILR station for the Reigate area, R.Mercury (now testing) on FM. Stations raided were Horizon, JFM, London Weekend R., and one other which we don't know. Since then, several others have temporarily closed to avoid being raided.

Bye,

FFFR

countries upon request. Subscription is payable in banknotes only, please ! International
Money orders are not accepted !

PAGE 5 - LAST MINUTE INFORMATION

R.48, c/o Postbus 19074, 3501 DB Utrecht, The Netherlands, was on
on October 7 via a car whip-antenna attached to the roof-rack (!!!!)
and he thinks that the vertical antenna has produced too much skywave ,
the reason for the signal skipping almost over the whole UK.
The antenna used was a 16 feet (around 4.80 m) tank-coil vertical rod.
Look at the SINPO, especially on the continent and then close your mouth.

R.49. Steve Most will be back on the air soon with his station.
They will use the new Hunstanton mailing address on their first 2-hour-
test on ,probably, 6205 kHz.

Shamrock R.Int from Ireland now uses the following mailing address:
136 Staniford Road, Dublin 16, Ireland. They are still looking for a
clear frequency, as it seems.

And that ends up RADIOTELEX 33 - definitely.

07-11-1984

Hi there !

Back again after another two weeks waiting for the latest issue of RADIO-TELEX. Indeed, some more wrote in and we still hope that also tomorrow some contributions from the UK and Sweden will arrive. Well, yes, we are not out on Wednesday - we have to put it to a Thursday again - please understand this.

"Deadline-zone" for the next time (RT 35) is November 20/21, 1984 !

The loggings, time again is in GMT !

Stuart Hardy, "one half" of this really informative magazine, recently stated that he thinks that ASN will finish for good after the next two issues. We think that this is a great shame as there are only very few English language magazines left on the market - there is us, RT, and the weekly info from Anoraks UK. Really a pity. Here is the address for ASN again (for one of the last times?):

The latest Free Radio news!

According to a letter received from the station, Radio Black City (Dedemsvaart-address) got 121 letters for their test transmission on September 9 and apologies for delays in replying to them. In the future, RBC is going to air further programmes on the 41m band occasionally.

Also information from stations printed in Dutch or English is published in the CLCG-magazine when it is send to the club's address P.O.Box 540 101, D 4100 Duisburg 11, W.-Germany. Also schedules, news, and views are welcome at this address. Also stations are asked if they would relay programmes of the CLCG. Sample copy of the CLCG-magazine for DM 2,-- or 2 IRC.

A 2-hour-test-tape of the Free Radio Service Holland (FRSH) is still aired via Delmare. Check out for FRSH on November 18 on 41 metres (maybe around 7345 kHz) as there is a chance for a relay lasting 3 hours or so.

Of course, there is one magazine to add to the "sticker congregation" at the bottom of page three. Anoraks UK are running a 'Weekly Report' that is posted immediately on Monday (one day later !!) and is featuring Irish news (brand new are expected in their next double-edition 26/27 which must be out this week !) as well as news on landbased regional stations on mediumwave and FM and on page four (A5) you'll find a UK-shortwave-log plus commentary...well worth trying ! Their address is, as I have no more of their large-sized stickers left: Anoraks UK, Barrie and Ruth Johnston, P.O.Box 539, Blackpool FY1 4RE, England. Send 1 or 2 IRC to them.

Now back to the stations themselves.

Future World Radio which appeared on 7310/15 kHz twice that far uses the mailing address of Postbus 725, Arnhem, Holland indicating potential links to KBC Radio, in fact, we think it is the same station.

Mi Amigo Radio Int from Ireland intends to put a 400 Watts rig on the 48 metre band soon. Furthermore, tests are to be carried out in the 19m-band (15000 - 15050 kHz) as well. Remember that the North Street-address no longer is in use !

Propagation. A 27 day cycle seems to have occurred the last months bring almost the same reception pattern as equivalent Sundays before, so one might be able now to check up or predict certain conditions before each Sunday. Try to classify into a) good Sunday - short skip receptions with good signals as well as all the other usual stuff from the other countries with moderate to good levels on both 48 and 41 metres b) fair Sunday - good signals but a lot of long skip receptions (long skip = large dead zone between transmitter and receiver) making it almost impossible to hear local stations. 48m seems to be slightly better for local coverage than 41m. c) bad Sunday - noisy and low signals, you had better not left your bed !! Anyway, don't be too surprised when your predictions are not O.K. - it might just be a d) ha-ha-ha-Sunday....

R.49 International will start soon with its transmissions via their own transmitter (c/f RT 33), probably in mid-November ! Furthermore, they will be relayed by R.Mi Amigo Int with the 400 Watts-thing (see above !) on 6285/90 kHz soon - just keep listening. They will use the address at P.O.Box 5, Hunstanton, Norfolk PE36 5AU, England. Another delay was caused due to parts of the R.49-studio being stolen !

Sunshine R. from Ludlow are now also on FM 103.5 MHz in parallel to their mediumwave outlet on 1017 kHz. They will keep up the station as long as it is possible to stand the DTI.

Westside R. Int now have a new address: c/o 310 Collins Avenue West, Dublin, Ireland. the address of Anoraks Ireland from which we haven't heard for quite a while now...

And that ends up RADIOTELEX Number 34 for this time. Please keep up sending in your contributions as we have to make the best of Free Radio as it is today. Keep us informed !

73's and FFFR !

REMEMBER: ANY OF THE ABOVE IS FREE FOR PUBLICATION AND TRANSMITTING-PURPOSES PROVIDED RADIOTELEX IS CREDITED ! THANK YOU VERY MUCH.....

22-11-1984

Hi there !

Again out on a Thursday as it was a holiday in Germany so no mail
 with the loggings and news of November 18 could have been received
 too numerous before today.

Conditions seem to have turned back to some 'normal' level, please see
 the logs for details.

Deadline for RT 36 is December 5, 1984.

NEWSSECTION

R.Apollo International's next transmission will probably be in mid-December unless he is testing from Scott Base before then. They recently invited their listeners to participate in the Christmas broadcasts and also the third birthday broadcast in January by sending in a short message on tape (1-2 minutes), perhaps a greeting to someone, plug for their club, or whatever...the tapes will be returned afterwards. For the last transmissions they received around 35 letters via P.O.Box 5, Hunstanton, Norfolk PE36 5AU, England and P.O.Box 750 925, D 2820 Bremen 70, West Germany.

R.Big Brother, c/o RT-address, made its second official broadcast on November 18 on or around 6234 kHz in the 48m band. The reception in Germany was quite good, looking at the loglistings of the German contributors to this edition. In this broadcast they discussed a Free Radio proposal made by an English group one or two years ago. The next transmission is set for December - as the irregular schedule tells no exact dates.

Britain Radio International (BRI) tested on November 18th on the unusual frequency of 6230 kHz announcing that letters and reports for that test broadcasts should be send to their Dutch address (Postbus 19074, 3501 DB Utrecht, Holland). Roger Davis stated that they haven't received any mail via 32 Victoria Road at Salisbury over the last few weeks, but they hope to solve that problem very soon. Hopefully, this address will not turn out to be a second 'P.O.Box 319'... BRI also had the "enemy" around on the 4th Sunday last month so we guess that's also a reason for tests and for the reports wanted to the Dutch address.

R.Caroline / offshore have now announced that they will soon re-start on 576 kHz (not 531 per rumours !) with Dutch programming. 963 kHz will become more album orientated then.

/via John Burch-Caroline Movement

The Free Radio Service Holland (FRSH), Postbus 41, 7700 AA Dedemsvaart, Holland, returned definitely on November 18 with a 3-hour transmission including 60-minute-shows by Peter Verbruggen, Joop ter Zee, and Bert van Leer. The broadcast was put out by Delmare on 6206 kHz and by another station from the continent on 7316 kHz which showed the same programming although not simultaneously. FRSH hopes to be on each 3rd Sunday of the month via Delmare on 6206 kHz and maybe via other stations as well, the latter ones probably on an irregular basis only.

Mi Amigo R. International from Ireland announced on their transmission on November 11 that the North Street, Swords - address had not forwarded any mail for some time now ! They transmit more or less regularly on 6289 kHz

According to R.Victoria, R.Milano International is looking for a new frequency in the 41 metre band to transmit in addition to their well-known 7295-channel which is about to suffer from interference with R.Moscow for the time being. Check out on 7145 kHz during daylight hours...

R.49 International, c/o Hunstanton-address, returned via Delmare also on November 18 on 6206 kHz. Watch out for future programmes via their own transmitter of approximately 3 (three ?-ed) Watts of power on 6243.3 kHz (Oh, don't be so silly to go out there because of the "U"-beacon on 6245 kHz. This could destroy the programmes...-ed) plus various other relays (c/f RT 34). These will include programmes presented by Steve Most and Richard Graham (R.Pacific Int) as well as a German show.

Now over to Scottish news:

In Edinburgh, the long running Radio Telstar International can be heard on 1332 kHz announcing 222m with 150 Watts. They can be heard now and again on Sundays running a schedule of 1000 - 2000 with live programmes. They have announced that they will broadcast weekly but this has not happened yet. Also in the capital, R.Free City have recently stopped broadcasts on FM using 15 Watts. It's throught that this was due to lack of listener response and not a raid. Free City used to broadcast tape programmes all day on Sundays and now plans to resume operations on shortwave !

A report from northern Scotland says that the ex-shortwave station R.Lynda is broadcasting to the area of Aberdeen on 1332 kHz on Sundays from 0000 to 0300. The transmitter is said to run about 120 Watts so maybe a possibility of long-distnace DX ??

In the west of Scotland, two stations have tested over the last months. Radio Gloria has been noted on 1611 kHz on several occasions with a series of short tests. The station has several transmitters ranging from 20 to 100 Watts. It's not know if regular programming will commence.

Some weeks ago, a test was made by Radio Active around 1800 one Monday night. During this short test, non-stop music was played and only two announcements saying it was a "local community station" which would be starting soon on 1242 kHz, 242m. Since then, nothing has been heard.

Radio Sound of Switzerland, Postbus 41, 7700 AA Dedemsvaart, Holland, received around 50 letters for their first official transmission on October 28. They admitted that their programmes not only shall include music, music, music but also some talk. They think that they will improve their style by Christmas when they are going to have some extra-transmissions. SOS broadcasts via own facilities from Switzerland (around 15 Watts ERP) and NO connections exist with R.Madison, they claim....

Spectrum World Broadcasting informs us that they hope to be on 75,47,39, 31, and 21 metre-bands during the Christmas/New Year period. Schedules will be issued shortly giving further details. Perhaps long-skip will make it accross the Atlantic ...?

In No.34 of RT we absolutely forgot to mention the address of the Dutch R.Telstar which is : Postbus 59, 7260 AB Ruurlo, Holland. This address has been used by the station Mebo 2 in the past, so it's up to you to draw your conclusions...

The various "UK RADIO"-tests heard on November 11 came via the following stations and were part of a planned '6240-network':

UKR (1) is the original and came from the original UKR-transmitter.

UKR (2) was put out via Norman Nelson's Eastcoast Commercial and nr.3 was relayed by Dave Scott from RAI.

The last one: R.Valleri say that they will return on 6870 kHz soon !

06-12-1984

Hi there !

Back again after two weeks of silence - apologies due to the current issue missing some of the loggings from the UK but it seems as if recently some "embargo" has been initiated by a special person living over there...sad,sad to say that some people always try to take Free Radio in their hands.

Special "thank you's" over to Sweden from where we received a useful
logsheet - take it as a substitute for the missing UK-ones on December
2nd.

Deadline for RADIOTELEX 37 is December 19/20, 1984, in other words "some days before what other people call X-mas...hi"

The LOGGINGS, time is in GMT !

NEWSSECTION in RADIOTELEX

To start with this time, here is the new address of ABC R.Tramore who recently moved over in a new premises: ABC Radio, No.4 Arundel Square, Waterford City, Republic of Ireland. Anybody who likes to phone in, the number is Waterford 75620.

Here is the latest news concerning the close down of the well-known AIRSPEC-newsbulletin. Stuart Hardy wrote:
"After issue 12 of ASN, it was decided that the magazine would have to become an irregular publication. Both Steve West and myself were finding it increasingly hard to keep to deadlines and produce anything worth reading at the same time. Also, the photocopy magazine which we use was showing the strain which we impose upon it (over 3000 copies in less than three hours !). After issue 13 we hoped to be able to continue bringing AIRSPEC out on an irregular basis, and then when all subscriptions run out with issue 17, we would continue irregularly, without a subscription-service. However, by late September it became apparent that the mag would have to close for good by issue 17. We decided to continue publishing as before, and announce this news in issue 16. A casual mention of this in a letter to a friend produced a rather unusual idea. He and his friend wanted to take AIRSPEC over and publish it themselves. Whilst I welcomed this offer, I decided to decline. AIRSPEC is a very special mag and I would not like to see anyone else take it over. Part of our appeal is in the two editors constantly arguing and complaining

AIRSPEC-statement continued...

about each other (all in fun, of course). If anyone took it over, it would just be a different magazine with a familiar name. Next, to shorten the workload, I decided to publish only three more issues (14, 15, and 16/17 as a bumper "Goodbye" issue). But by the start of November, it became apparent that the restrictions of time were greater than we had allowed for. There simply is no time for either of us to produce a mag anymore. At this point it was decided to bring out just one more issue, and then to pass on all the remaining subscription money to the new magazine "WAVELENGTH" (edited by the people who originally offered to take over AIRSPEC). However, last week we received an offer from our old friends Barrie and Ruth of Anoraks UK to take the subscription money off our hands and to use it to send out their Weekly Report.

So, our plans are now to produce one final magazine sometime after X-mas (ASN would have been 4 years old in April). Details have not been finalised at the present time, but it is likely that the Anoraks UK Weekly Report will be sent out to any subscribers who have subscriptions remaining. The final AIRSPEC will hopefully contain a history of ASN, predictions for the future of Free Radio, and all those other articles that Anoraks like to read! Apologies to anyone who has subscribed since issue 13 and received nothing. All letters received before December 1st containing sub's will be processed in the normal way, and receive ASN 14 and the Weekly Report. Sub's received after that date will be returned to sender with a covering letter. Any outstanding SAE's will be used to send out copies of issue 14.

Neither Steve nor myself have concrete plans for after ASN. Steve will probably become increasingly involved with Anoraks UK. I would like to return to being just a listener. Pirate radio has occupied a space in my life for over four years now, and I now find that, without becoming entirely disillusioned with it, I would like to have less to do with it.

As a "real" magazine, ASN exists no more."

/Stuart Hardy

RADIO APOLLO INTERNATIONAL

P.O. Box 5, Hunstanton, Norfolk, England, PE36 5AU

P.O. Box 750 925, D-2820 Bremen 70, West Germany

NEXT BROADCASTS 6200kHz on either December 16th or 23rd
41mb during Christmas week, and our 3rd birthday broadcast
in mid-January.

COMING UP ON R.A.I. more chat, a letters programme, Dave Scott with more free radio talk including the 48mb's most comprehensive free radio news programme "APOLLO-DX". John Allen with more of the most professional show on shortwave. Mike Davis with another exclusive documentary, Phil Abbott will be returning to the fold with more music from the independent record labels. Plus relays of Radio Enterprise from Holland and also a special from Radio Nova International from the USA.

TAKING FREE RADIO INTO 1985, R.A.I. "THE BIG A"

Britain Radio Int (BRI) have announced that they will be on three times over Christmas, on December 23rd on 6230 kHz and on the same frequency on Wednesday, December 26th between 1000 and 1230, as well as on December 30th. They like to have their reports sent to the Utrecht-address which is Postbus 19047, 3501 DB Utrecht, Holland.

Radio Caroline SW is not planning to resume regular transmissions at the present time. However, Freddie Archer is willing to pop up occasionally on 48 metres assisting the offshore-Caroline. Meanwhile, the Brandon P.O. Box has been dropped due to a few local problems and you can contact RCSW via the Hunstanton address service now. The station also offers video

Box 220342, D-5600 Wuppertal 22

tapes and various other Caroline-orientated sales items (more info for SAE or IRC). RCSW might be back by X-mas.

Radio Eastcoast Commercial closed down for good on December 1st, 1984 due to heavy pressure by the authorities. This also means that the UK Radio (2) experiments with Kelly Brown will be cancelled. As far as the WRLI-relays are concerned, the people around RECC persist that these tapes have not been put out by Norman Nelson and the DX-editor of RECC now indoctrinates all the other DX-ers he knows with the pure nonsense that RADIOTELEX knows it better and that those DX-ers shouldn't send their contributions to us to boycott us. RADIOTELEX has the information that Norman Nelson himself stated that he relayed these tapes. Information from two different people who haven't to do anything with each other. We have nothing to add.

Free Radio News is a brochure issued by two Swedish DX-ers and appears monthly. FRN costs 2 IRC for a single copy or 15 IRC for the next 12 issues. The address is FRN, c/o Apelvägen 13, S 330 17 Rydaholm, Sweden.

R. Hotel Amigo is currently testing a "new" old army transmitter of unknown power output on 48 m and is looking for a clear spot on the band to use in the future. There is a chance that real programmes will be aired again but due to the operator lacking time these could be occasional only. By the way, RHA replies to letters; Postbus 113, 9104 ZJ Damwoude, Holland is the address.

KBC R (Postbus 725, Arnhem, Holland) declared that they are not identical with Future World Radio although both stations are said to be using the same type of transmitter. Judging from frequency choice and sound/modulation quality there appears to be a link between KBC, FWR and the recent 41m transmissions of R. Brigitte... perhaps a 'Belgian-network' ??

Radio Victoria announced a test of R. Milano Int on December 2nd after the close-down of RV on either 7145 or 7230 kHz. According to a DX-er in the GDR, RMI already has been noted testing on 7145 kHz on November 17th at 1100 GMT.

R. Monique Int appears to be the latest offshore project, a Dutch station that is believed to start via R. Caroline's 50 kW transmitter very soon. A 10 kW tx has been acquired from the Irish South Coast Radio to put Caroline's programming on 576 kHz. RMI will transmit 0500 - 2000 CET and after that, Caroline might put their programmes on 963 kHz for the rest of the day. The station will keep a Top 40/MOR format of purely Dutch productions as it seems. /FRS Goes DX 29

R. 101 International couldn't be heard today because storm damaged the antenna system. An engineer flew to Ireland this weekend and R. 101 hopes to be back next Sunday if it wasn't a serious damage! /via PIN

The editor: Do you really think that R. 101 Int is located in Ireland? The "engineer" also could get to the transmitter by bicycle, couldn't he ?

The last item concerns the new magazine from the UK, called WAVELENGTH. The first issue will be out in early December and the prices are as follows: Years subscription (6 issues) = UK+Eire £ 2.40 Sterling, Europe £ 2.70 Sterling or 12 IRC, single copy = UK 20p plus a stamped addressed envelope (SAE), Europe 2 IRC. The address to write to is P.O. Box 5, Hunstanton, Norfolk PE36 5AU, England. The magazine is printed by "Applegate Press" in London and edited by Adrian Cooke. Write in !

And that ends up RT 36. Thank you for your patience !

73.

20-12-1984

Hi there !

This is RADIOTELEX back again - hope you are fine !
 Are you also so excited what Christmas and the New Year will bring-
 Free Radio -wise ?
 Well, remember to tune in on December 23-26, and December 30 to January 1,
 1985 and remember the deadline which is on Januray 3, 1985. We hope to
 be able to present you the brand-new loggings then !

NEWS SECTION

R.Apollo Int tried a 'Scott Base'-test on December 9 but had a lot of problems to tune the transmitter up properly. He put out the Dutch and German programmes and also a 30 minute relay of R.Nova - USA (their address is P.O.Box 245, Moorhead, Minnesota 56560, USA) as well as a short Dave Scott show. Well, the next regular Apollo (the last time this year, by the way) will be on 23-12-1984 on 6200 between 0945 and 1300 with the Christmas broadcast including APOLLODX and a mail show. They have two addresses available: our one here at Bremen and via P.O.Box 5, Hunstant, Norfolk PE36 5AU.

R.Arena, Postbus 47, 7010AA Gaanderen/NL, is going to broadcast again either on the 25th or 26th December on 48 metres using a 200 W transmitter. This station is also operating on Sunday mornings on 227m medium wave. New QSL-cards should be available for the X-mas programme.

R.Atlantic 2000 which at this moment still uses the PB 41 - mailing service plans to announce the RT-address soon - so don't be surprised when you hear it announced in the future. The station recently showed again more activity.

Also R.Atlantis SW will be on December 23 on most probably 6200 or 6225 kHz. As written earlier (c/f RT 32+33), RASW also plans to have parallel outlets on FM 105 MHz and mediumwave 1140 kHz. RASW uses the same two addresses as R.Apollo. Also R.Marabu Int from West Germany can possibly be heard as a relay this day on Atlantis. Contact via RT-address.

Canzoni Radio is a new project planned to go out first via R.Delmare's transmitter in either January or February 1984. They then will use the Radiotelex-P.O.Box.

News from the Clandestine Listeners Club Germany, CLCG.

It may be possible that R.CLCG can be heard on December 23, 1984 via the transmitter of Delmare between 1200 and 1300 and also on December 25/26 relays may be audible. Write to P.O.Box 540 101, D 4100 Duisburg 11, West Germany.

Will you become member of the CLCG in 1985 ? Subscription for 12 magazines is DM 24 (FRG) and DM 26 (Europe). Overseas sub also possible.

Special offer:

2 magazines of 1983 and 2 from 1984 for only DM 5 / Foreign countries DM 6. Will be sold as long as on stock.

Crystal R. on 7375 kHz told a contributor that they also will appear on both 25 and 26th December. Contact via 190 Monument Road, Edgbaston, Birmingham B16 8UU, UK.

The Free Radio Service Holland might be back on December 23rd on 48 and/or 41 metres with a repeat broadcast of their X-mas show aired originally on December 16th. Furthermore, FRSH will have another transmission lasting 4 hours on December 30th, 0900 - 1300. January 1985 will see the return of the complete programme schedule every 3rd Sunday 0900 - 1500 on 6205 kHz and on 41 metres as well where they at the moment use a 18 Watts rig which is to be modified very soon. A video clip is also available showing the DJ's in action in the old studio. Postbus 41, 7700 AA Dedemsvaart/NL is the address.

According to a letter from the station, Future World Radio is the SW-outlet of the Dutch TV (!! -ed) -pirate TV Lunteren. Like KBC R., FWR is using a VFO-controlled, all transistor transmitter made in Japan. The station may be back soon again with a "Golden Sixties Show" featuring music of the years 1960 to 1970. FWR's address is Postbus 725, Arnhem/NL.

R.Ireland Int which were heard recently back on 6310 kHz, has the following address: c/o 37 Willow Park Crescent, Glasnevin North, Dublin 11, Rep. of Ireland.

London Greek R. on 1611 kHz mediumwave which is on daily is heard widely, also reported in Sweden. Listen out for this one anywhere in Europe.

R.Monique Int made it to the airwaves on Saturday, December 15 on 963 kHz. Full programming will be introduced on December 22 as so far, more or less nonstop music and jingles have been broadcast.

The broadcast from R.48 on December 9 was possibly again broadcast via the car whip antenna on 7360 kHz but they surely had their first programme in Dutch with a YL DJ aired this day. c/o Postbus 19074, 3501 DB Utrecht/NL.

R.101 Int will approximately stick to 7445 kHz though tests on other frequencies in the 41 m band might be possible. Also, (as an extra ? -ed) new programme tapes are aired now. (thanks goodness !!). The address is Postbus 2, B 4680 Gemmenich, Belgium.

Radio Sound of Switzerland plans to be back again over X-mas, most probably on the 41mb. This will also include a feature on the Swiss privately-operated local radio stations. via PB 41, Dedemsvaart.

Spectrum World Broadcasting plan a special 'marathon transmission' this X-mas which is explained on the next page, here is a short introduction to the transmitters used: T=50Watt AM ; V=220 Watt SSB ; S=50 Watt AM ; H=100 Watt AM ; MI=100 Watt SSB. The antennas are half wave dipoles, Yagi beam antennas for above 10 MHz, and full wave longwires.

SPECTRUM WORLD BROADCASTING SCHEDULE D 84/85

Mb	KHz	0	02	04	06	08	10	12	14	16	18	20	22	0	Tx	Notes
Sunday Broadcasts to North and West Europe:																
47	6272														T	I
Holiday Marathon Broadcasts 26-12-84/2-1-85																
76	3905														V	2
47	6272														S	3
39	7710														H	4
2I	I 3735														V	5,7
3I	9xxx														MI	6

Key to the Notes column:

- 1 = 1 hour earlier in Summer, may be used from 0730.
 2 = Tentative frequency, may be 3900-3950, only available 31-12-84 & 01-01-85.
 3 = Frequency of 6205, 6240, 6270 may be used, may be available 24h
 4 = Possible 24h availability, depending on maintenance
 5 = Frequency liable to change, 13600-13800, not available at times (note)
 6 = Tentative: 9940, 9960, 9965, 9985
 7 = May be replaced by 15020/19mb

Spectrum WBC can be contacted at 134 Eastworth Road, Chertsey, Surrey KT16 8DT, England.

Station 41 - do you remember this? Well, they will be almost 100% back on December 25 on 41 metres (7373 kHz?). The address is: 7 Chantry Avenue, Hartford, Northwich, Cheshire CW8 1LZ, England.

Also Radio Sylvia from Germany will be on December 23 between 1100 and 1300 GMT as they announced on December 9. The address is: Radioklub Sylvia, Postfach 600 431, D 2000 Hamburg 60, West Germany.

Radio Telstar from Edinburgh will be on air possibly over X-mas and if they are, Weekend Music Radio will relay them for a while. On November 18, 1984, while on 1332 kHz RT was raided but the OP saw them coming and threw the transmitter out of the window where his mate ran off with it. The GPO had to admit defeat this time but said that they'd catch them next time. Well done, Telstar!

Frequencies for Weekend Music R. are 6200 or 6240, 7410, 15045, after 1300 5010 or + and 6240 + 74...?? . QSL's are promised to arrive very soon, the address is 42 Arran Close, Cambridge, England. Oh, the frequencies above are valid for the morning of December 25th and 26th!

And that ends up RADIOTELEX No. 37. Thank you all for sending in lots of goodies and I hope to see you all back in 1985! Gosh, now my typewriter-ribbon has run out during the last lines!

Till next time and 73 + FFFR,

RADIOTELEX
